

Instructions to Offerors and Important Information

1. Each worksheet identifies one material, e.g. Corn Flakes, Corn Rice Biscuits, etc.
2. In the 'Product to be Delivered' Box, either identify an existing material code from those listed, or provide all required information for the product the bidder proposes to deliver.
3. Specify only one configuration for each material for each region.
4. In the Delivered Price per Pound Box, identify the delivered price per pound for each state. The bidder may identify a different price for each state. The price is the same for all destinations in each state, regardless of city.
5. All weights are net.
6. There is no requirement to bid on every material, but for each material offered, all states must have pricing.
7. Existing material codes are provided as examples of how the government has previously ordered these materials. This information is provided only for reference.
8. Quantities provided on each worksheet will be used for evaluation of bid pricing only. These estimates are not minimums, maximums, or guaranteed quantities.
9. Historical ordering patterns in the tendering text are supplied for offerors convenience and may not reflect future ordering patterns.
