Direct Hay Weighted Average Report for week ending 11/22/2024

After a very warm weekend it felt like winter as winds turned from the north mid-week and much colder air arrived. Scattered rains continue to provide slight improvement to the drought monitor. Currently about 50 percent of the state is drought free with the other 50 percent fairly evenly split between D1 and D2 status. Hay movement is light. Hay prices are steady. The supply of hay is moderate to heavy, and demand is light. The Missouri Department of Agriculture has a hay directory at <https://apps.mda.mo.gov/haydirectory> or visit the University of Missouri Extension feed stuff finder at <https://feedstufffinder.org>
