Direct Hay Weighted Average Report for week ending 11/15/2024

Many farmers in the south are now in clean up mode following the historic flooding in some areas. Fence repair is the most pressing task, but the removal of limbs and trash is also going to have to take place. Roads are being repaired but some are expected to take a significant amount of time and work. Even with the extreme rains other areas of the state are still dry. All of the western and northern parts of the state are still showing on the drought monitor accounting for 60 percent of the state. Hay prices are fully steady. The supply of hay is moderate to heavy, and demand is light. The Missouri Department of Agriculture has a hay directory at <https://apps.mda.mo.gov/haydirectory> or visit the University of Missouri Extension feed stuff finder at <https://feedstufffinder.org>
