MMN Slug ID 1049 /Slug Name: MD_DA650

Email us with accessibility issues with this report.

Low/medium heat nonfat dry milk (NDM) prices were unchanged on the range, but slipped lower on the top of the mostly price series. Contacts continue to say supplies are generally limited, while demand tones are steady or quiet. Both domestic and Mexican trading activity is expected to quiet down until early into Q1. Condensed skim availability has increased in recent weeks, but production is expected to shift lower during the holidays. Condensed skim handlers in the Midwest say condensed skim availability will be at a value over the upcoming end-of-year holiday weeks. High heat NDM prices moved up on the bottom of the range, on moderate trading activity. Currently, market tones are quieting. Near- to mid-term tones are uncertain.
