

KANSAS WEEKLY MARKET RECAP

Recap For Week Ending

January 17, 2025

Receipts: This Week: 20,920 Week Ago: 5,576 Year Ago: 3,926

Compared to last week, steers and heifers sold 2.00 to 4.00 higher. Demand was good to very good. Slaughter cows and bulls sold steady to 2.00 higher and Bulls sold 2.00 lower. In the hay market, demand remains light, despite the winter weather and prices remain mostly steady. Previously purchased hay has been moving, when drivers can move it on the ice and snow packed roads. Some folks have reported that they need to buy grinder hay, but many producers are holding on to their supplies hoping for higher prices. The supply of hay available remains heavy as almost all contributors indicated that there is still 2023 and 2024 hay sitting around. The National Agricultural Statistics Service (NASS) released their 2024 Annual Crop Production Summary. According to NASS Alfalfa hay production, at 1.54 million tons, is down 31% from a year earlier. The average yield, at 2.65 tons per acre, is down 0.40 ton per acre from 2023. Area harvested, at 580,000 acres, is down 21% from 2023. Alfalfa for haylage and greenchop production, at 150,000 tons, is up 355% from last year. Average yield at 6.00 tons per acre, is up 3.80 tons from last
