

"Manufacturing allowances"
docket # "A 0-14- A74"

COPY

I cant understand why us farmers have to pay milk manufacturing costs. Why dont you charge the consumer for this? ~~and~~ Americans spend alot of luxury they could pay more for food. I am not fond of subsidies, either just more red tape and regulations. Lets keep it simple and pay the farmer a reasonable price for his product. Its bein said that farming is the only business that buys retail sells wholesale and pays freight both ways, and now you expect the farmer to pay the milk ~~processing~~ processing. its like you expect us to fall in the outhouse and come out smelling like roses. If this keeps on the farmers will be put out of business then what? If the U.S. cant feed its self were done for.
