Room 1083 South Building  
United States Dept. of Agriculture  
Washington, DC 20250

Sir:

Sarah Farms raw milk production for the last 90 days was 15,835,086 pounds. Sarah Farms Milk Plant bottled and sold 4,290,627 pounds of Class I milk for that same 90 day period. We feel that the tremendous difference in production and sales constitutes our reserve supply to be drawn upon when increased sales warrant it.

This information was inadvertently left out of our original reply and we wish that you would include this pertinent data as part of Sarah Farms Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and Order.

Sincerely,

Clyde Edgar  
Sales & Operations Manager
