

**Response to Request for Data Submitted by Benjamin Yale on behalf of
Select Milk Producers, Inc. and Continental Dairy Products, Inc.**

Item #1 –

Data is provided in this response however, it does not adhere directly to the format utilized by the Pacific Northwest and Arizona Orders in their reporting of similar figures. It does provide the following:

- Cooperative Class I price per gallon**
- Federal Order Class I price per gallon**
- Over-Order Premium price per gallon**
- Retail Price less Cooperative Class I price per gallon
- Retail Price less Federal Order Class I price per gallon

**These figures are all provided on a 3.5% butterfat basis. The retail price used is for whole milk (likely about 3.25 percent fat).

Item #2 –

The report posted in the National Hearing on website showing Annual Route Sales by Handler Type—Eight Orders which has been entered into evidence as Exhibit No. 6 cannot be expanded to apply to all ten Federal Orders. Should this table be expanded to include information from all ten orders, it would be possible to extract restricted information using other data sources that are currently publicly available. This explanation was provided in sworn testimony given by Mr. Clifford Carman, Assistant to the Deputy Administrator, AMS – Dairy Programs.

Item #3 –

Data is provided in this response however, certain restrictions apply.

Item #4 –

Data is provided in this response however, certain restrictions apply.

Item #5 –

Data is provided in this response however, certain restrictions apply.

Item #6 –

Data has been provided. Corrections to data from the Upper Midwest (F.O. 30), the Florida (F.O. 6) and the Southeast (F.O. 7) marketing areas are included in this response.
