Definitions:

FGIS = Federal Grains Inspection Services

COC =Certificate of Conformance (Note: the AXX designation represents the NTEP amendment version)

CAP = Capacity

E = Verification division size D = Division size

Class = Scale class for a marked scale

Grain = Type of grain approved for, if appropriate.

v = Varies. Scale may be marked or unmarked depending on date of manufacture.

* For Ohaus scales, the * = 1 or 0 depending on optional features.

** For Mechanical Sampler manufacturers, some (but not all) models offered will meet GIPSA requirements

Final approvals are obtained after installation and testing. Some older manufacturers are not listed, but they remain approved.

*** The "Active" list contains items that are commercially available for purchase. The "Inactive" contains items no longer manufactured or widely marketed, but that remain approved for use.

**** Precision-type sieves must be used for official determinations and are required to be check-tested annually. Commercial-type sieves are permitted for use as an aid only. Refer to Table 1.3 in FGIS Grain Inspection Handbook II for grain-specific sieve type and size requirements.
