# Harmonized GAP Plus+ Standard

A global market-access solution for the  
specialty crops industry

**May 16, 2018**

For Official Government Use Only.

The USDA Harmonized GAP Plus+ Standard is based on the Produce GAPs Harmonized Food Safety Standard developed by the GAPs Harmonization Initiative. Use of the Harmonized Food Safety Standard has been granted by the Secretariat of the GAPs Harmonization Initiative through a non-exclusive copyright license agreement which includes permission to insert additional audit requirements beyond those listed in the Harmonized Standard. Additional requirements are designated by any requirement number ending in a letter. (i.e. G-1.1a)

This issue of the United States Department of Agriculture's Harmonized GAP Plus+ Standard supersedes the previous issue which has been in effect since January 5, 2018.

---

**Non-Discrimination Policy:** In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination Complaint](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: [program.intake@usda.gov](mailto:program.intake@usda.gov).

USDA is an equal opportunity provider, employer, and lender.

## Introduction

The USDA Harmonized GAP Plus+ Standard is based on the Harmonization Initiative Harmonized Food Safety Standards located at: <https://www.unitedfresh.org/food-safety/gap-harmonization-initiative/>. This standard was built on the concepts of risk identification, control and mitigation of risks, monitoring, verification, and documentation. These mirror the Codex Alimentarius Principles of HACCP (<http://www.fao.org/docrep/005/y1579e/y1579e03.htm>).

Requirements of the USDA Harmonized GAP Plus+ Standard reference adherence to “current industry practices”, “regulatory requirements”, and “prevailing regulations” – these may include, but are not limited to, the Food and Drug Administration Produce and Plant Products Guidance Documents (<https://www.fda.gov/Food/GuidanceRegulation/GuidanceDocumentsRegulatoryInformation/ProducePlantProducts/ucm187676.htm>), the Food Safety Modernization Act (FSMA): Produce Safety Rule (<https://www.fda.gov/Food/GuidanceRegulation/FSMA/ucm334114.htm>), Codex Alimentarius Recommended International Code of Practice – General Principles of Food Hygiene (<http://www.fao.org/docrep/w8088e/w8088e04.htm>), and the WHO Guidelines on the Safe Use of Wastewater and Excreta in Agriculture ([http://www.who.int/water\\_sanitation\\_health/sanitation-waste/wastewater/wastewater-guidelines/en/](http://www.who.int/water_sanitation_health/sanitation-waste/wastewater/wastewater-guidelines/en/)). Additional requirements are included to align this standard with the Global Food Safety Initiative (GFSI) Guidance Document Version 7.1, Part III, Scopes of Recognition BI- Farming of Plants, and D- Pre-Processing Handling of Plant Products (<https://www.mygfsi.com/news-resources/news/press-releases/670-version-7-1-of-gfsi-s-benchmarking-requirements-furthering-harmonisation.html>).

## Scopes of Audit

The Harmonized GAP Plus+ Audit is comprised of four scopes: General Questions, Field Operations and Harvesting, Post-Harvest Operations, and Logo Use. The General Questions scope is required to be completed for every audit. One or both of the Field Operations and Harvesting and/or Post Harvest Scopes will be completed based on the type of operation being audited. The Logo Use scope must be completed for any Operation who intends to use the USDA GAP & GHP Logo on packaging or promotional materials.

## Standard Layout

The standard has specified columns for the Requirement (Req. # & Requirement Description), Documentation (DOC), Mandatory (MAN), Procedure, Verification and Corrective Action.

**Requirement:** Is a specification of the conditions expected to be met by the auditee.

**DOC:** The auditing standards require verification of written policies, procedures and plans (WP); records (R); and risk assessment (A). To help auditors identify where documents (DOC) are required, the Standard includes a DOC column that designates the type of documentation to verify WP, R, A, or a combination of these document types.

**Written Policies, Procedures, and/or Plans (WP)** - A policy is high-level guidance that describes general goals and acceptable procedures for an organization. A procedure is a specified way to carry out an activity or process. A plan outlines actions that will be taken by an organization to mitigate risk. Policies, procedures and plans may be communicated orally or in writing. They are only required to be written if a WP is indicated in the DOC column in this standard.

**Records (R)**- A record is a document stating results achieved or providing evidence of activities performed. Records may include checklists, service records, billing forms, and water tests.

**Risk Assessment (A)**- A risk assessment is a process to identify potential hazards on a farm and/or

packinghouse as well as the likelihood the hazards will impact the safety of fruits and vegetables. Risk assessments should be documented in the manner which best represents the operation and the type of risk assessment required. This may include a combination of WP and/or R documents.

**MAN:** A ● in this column indicates a requirement that is mandatory and must either be assessed as compliant (C) or not applicable (N/A) in order to meet USDA Acceptance Criteria.

**Procedure:** Is a more detailed explanation of the conditions expected to be met by the auditee in order to meet the requirement.

**Verification:** Are the conditions verified by the auditor to determine if the auditee meets the requirement.

**Corrective Actions:** Are actions to be taken by the auditee if it is found that they do not meet the requirement.

## General Questions (G)

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>G-1: Management Responsibility</b>						
G-1.1	A food safety policy shall be in place.	<b>WP</b>	•	A written policy shall outline a commitment to food safety, in general terms, how it is implemented and how it is communicated to employees, and be signed by Senior Management.	The auditor observes the food safety policy, observes that it is signed by Senior Management, and observes that it has been communicated to all employees in a manner that can be understood.	The Operation creates or revises the policy, or its communication to employees, to be in compliance.
G-1.1.a	The food safety policy shall include measurable objectives for meeting the safety needs of products.	<b>WP</b>		A written policy shall include measurable objectives, each of which is defined and includes a plan to achieve it. The plan must include the timeline in which the objective will be accomplished, who is responsible for ensuring it is accomplished, and how the progress of completion will be documented and verified.	The auditor observes that the food safety policy contains measurable objectives and that the Operation is progressing toward their completion.	The Operation adds or revises its measurable objectives.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-1.2	Management has designated individual(s) with roles and responsibilities for food safety functions.	<b>WP</b>	•	The Food Safety Plan shall designate who has the responsibility and authority for food safety, including a provision for the absence of key personnel. Twenty-four hour contact information shall be available for these individuals in case of food safety emergencies. These roles and responsibilities shall be communicated within the organization.	Auditor observes that the Food Safety Plan has identified individual(s) for key food safety activities. Auditor verifies that procedures include provisions for when the identified individual is not present.	Operation identifies individual(s) for key food safety activities in the Food Safety Plan. Operation identifies actions to be taken when the identified individual(s) are not present.
G-1.2.a	The food safety plan outlines an organizational structure for at least those staff whose activities affect food safety.	<b>WP</b>		The food safety plan defines and documents the job functions and responsibilities related to on farm activities of at least those staff whose activities affect food safety.	Auditor observes documentation of job functions and responsibilities related to on farm food safety activities.	The Operation creates or revises the documentation of job functions and responsibilities related to on farm food safety activities.
G-1.3	There is a disciplinary policy for food safety violations.			There shall be a policy that establishes corrective actions for personnel who violate established food safety policies or procedures.	Auditor observes the policy and checks for examples of enforcement.	The Operation creates or revises the policy, or its communication to employees, to be in compliance.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>G-2: Food Safety Plan or Risk Assessment</b>						
G-2.1	There shall be a written Food Safety Plan. The plan shall cover the Operation. The Operation and products covered shall be defined.	<b>WP</b>	●	The Food Safety Plan shall identify all locations of Operation covered by the plan and shall identify physical, chemical, and biological hazards reasonably likely to occur and hazard control procedures, including monitoring, verification and recordkeeping, for all provisions covered by this audit.	Auditor shall observe the Food Safety Plan and verify that the plan has considered potential biological, chemical and physical hazards and has identified preventive controls for hazards that may reasonably affect food safety.	Operation develops or completes a Food Safety Plan for all locations of Operation.
G-2.2	The Food Safety Plan shall be reviewed at least annually.	<b>R</b>		Operation shall be responsible for reviewing their Food Safety Plan at least annually, documenting the review procedure and revising the plan as necessary. Updated or revised on date shall be indicated.	Auditor reviews last Food Safety Plan review.	Operation reviews Food Safety Plan and documents review.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-2.2.a	The Food Safety Plan shall be reviewed in the event of any change which may affect food safety.	<b>R</b>	●	The documented food safety plan review shall include evidence of management's commitment to establish, implement, maintain, and continuously improve food safety. Additionally it shall ensure access to necessary resources to implement plan, including suitably qualified personnel. The plan must include a review of all supplier specifications. An Operation should be continuously reviewing their food safety plan to identify any potential improvements.	Auditor shall review documentation for food safety plan review in the event of any change which may affect food safety.	Operation conducts a review of the food safety plan in the event of any change which may affect food safety, and provides documentation.
G-2.3* *This question does not apply to field operations in the Harmonized audit.	Operation has an Approved Supplier program for all incoming materials, including packaging.	<b>R</b>	●	Operation has and maintains a current list of approved raw material suppliers. Approved Supplier program includes a procedure for accepting materials from alternate sources.	Auditor verifies a list of raw material suppliers is maintained and current. Auditor verifies that all materials received from alternate sources has followed established procedure.	Operation develops an Approved Supplier program and maintains current list. Operation develops a procedure for accepting materials from alternate sources. Operation ceases accepting or shipping materials from non-compliant suppliers.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-2.3.a	Approved supplier program contains written procedures for the evaluation, approval, and continued monitoring of suppliers.	<b>WP</b>		The Operation shall document the procedures for evaluation approval, and continued monitoring of suppliers. Results of evaluations, investigations, and follow up actions shall be recorded for each supplier.	Auditor verifies documentation for procedures for evaluation, approval, and continued monitoring of suppliers as well as records documenting these activities.	Operation develops procedure and/or records for the evaluation, approval and continued monitoring of suppliers.
G-2.3.b	The Operation's Approved Supplier program includes procedures for approving contractors.	<b>R</b>		The Operation's program includes the approval of any contractors and food safety related services utilized by the Operation to ensure that all specifications are met. The program includes a procedure for accepting services from alternate sources.	Auditor verifies that a list of contractors is maintained and current. Auditor verifies that any services received from alternate sources has followed established procedure.	Operation develops an Approved Supplier program and maintains current list. Operation develops a procedure for accepting services from alternate sources. Operation ceases utilizing services from non-compliant suppliers or contractors.
G-2.3.c	Outsourced processes must be identified, documented, and monitored.	<b>R</b>		Outsourced processes (i.e. pest control, sanitation unit maintenance, harvest crews, etc.) must be identified, documented, and monitored.	Auditor verifies that outsourced processes are documented and monitored.	Operation identifies, documents and monitors outsourced processes.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>G-3: Documentation &amp; Recordkeeping</b>						
G-3.1	Documentation shall be kept that demonstrates the food safety plan is being followed.	<b>R</b>	●	Documents and records of procedures, standard operating procedures (SOPs) and policies shall be in place for meeting each of the food safety standards identified in the Food Safety Plan. Records comply with prevailing regulations.	Auditor reviews Food Safety Plan and verifies that all required documentation is available.	Operation develops missing documentation or recordkeeping procedures.
G-3.2	Documentation shall be readily available for inspection.		●	Documents and records may be maintained on-site or at an off-site location, or accessible electronically (e.g., MSDS), and shall be available for inspection in a reasonable timeframe or as required by prevailing regulation.	Auditor verifies that required documentation can be accessed in a reasonable timeframe.	Operation defines in food safety plan where and how documentation is maintained and expected retrieval time.
G-3.3	Documentation shall be retained for a minimum period of two years, or as required by prevailing regulation.	<b>R</b>	●	Document and record handling policy or procedures require that documentation required by the food safety plan shall be retained for a minimum of two years, or as required by prevailing regulation.	Auditor reviews document handling procedures and verifies that required documentation is available for at least two years, or as required by prevailing regulation.	Operation revises documentation procedures.
G-3.3.a	Food Safety Plan documentation and records shall be securely stored and effectively controlled.			The Food Safety Plan, documentation, and any records required to demonstrate the implementation of food safety are securely stored and effectively controlled.	Auditor verifies that documentation and records are securely stored and effectively controlled.	Operation stores their documentation and records in a secure location and implements effective controls for these records.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>G-4: Worker Education and Training</b>						
G-4.1	All personnel shall receive food safety training.	<b>R</b>	●	All personnel shall receive training in the food safety policy and plan, food safety procedures, sanitation and personal hygiene appropriate to their job responsibilities. Personnel shall receive training at hire and refresher training at prescribed frequencies. Documentation of training is available.	Auditor reviews program of required training and examines training records for evidence of compliance.	Operation shall develop and deliver required training.
G-4.2	Personnel with food safety responsibilities shall receive training sufficient to their responsibilities.	<b>R</b>	●	The individual designated for food safety responsibilities demonstrates knowledge of food safety principles. Food safety designate has completed at least one formal food safety course/workshop, by job experience or as required by prevailing regulation.	Auditor reviews the evidence of the individual's training relevant to produce food safety, such as a degree or course certificate or receipt, or attendance at a relevant food safety meeting, or company training record. If the Operation passes the food safety audit, the food safety individual's training is deemed adequate.	Individual must obtain demonstrable food safety training.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-4.3	Contracted personnel are held to the relevant food safety standards as they would be as employees.	<b>R</b>	•	Operation shall have procedures and/or records to demonstrate that contracted personnel whose activities can affect food safety have been informed of and, to the extent that can be verified, are in compliance with the relevant requirements of this standard.	Auditor reviews Operation's evidence that contracted personnel are trained to the same food safety requirements as employees would be and, if practical during the audit, observes contracted personnel for compliance.	Operation obtains evidence, trains or discontinues using contracted personnel.
<b>G-5: Sampling and Testing</b>						
G-5.1	Where laboratory analysis is required in the Food Safety Plan, testing shall be performed by a GLP laboratory using validated methods.	<b>R</b>		Operation utilizes laboratories that have, at minimum, passed a Good Laboratory Practices (GLP) audit or participates in a Proficiency Testing program, and utilizes BAM, AOAC International or testing methods that have been validated for detecting or quantifying the target organism(s) or chemical(s).	Auditor reviews Operation's evidence that only GLP laboratories and validated methods are used.	Operation discontinues using non-GLP laboratory and non-validated testing methods.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-5.2	Where microbiological analysis is required in the Food Safety Plan, samples shall be collected in accordance with an established sampling procedure and prevailing regulations.	<b>WP</b>		Operation utilizes a written sampling protocol when collecting samples for microbiological testing.	Auditor observes that the Operation has a sampling protocol for each type of microbiological testing required in the Operation's food safety plan.	Operation develops or obtains written sampling protocols for each type of microbiological testing required in their Food Safety Plan.
G-5.3	Tests, their results and actions taken must be documented.	<b>R</b>		All results for microbiological testing required in the Operation's food safety plan shall be recorded and the records maintained for two years or as required by prevailing regulation.	Auditor reviews Operation's recordkeeping of microbiological test results.	Operation maintains for at least two years test records for all required microbiological tests.
G-5.4	All required testing shall include test procedures and actions to be taken based on the results.	<b>WP</b>	•	For all microbiological testing required by the food safety plan, Operation has a written testing procedure that includes test frequency, sampling, test procedures, responsibilities and actions to be taken based on results. If finished product is tested for pathogens or other adulterants, Operation's procedures require that it shall not be distributed outside the Operation's control until test results are obtained.	Auditor reviews the Operation's microbiological testing procedures for completeness.	Operation revises testing procedures for completeness and to meet expectations of the food safety plan.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>G-6: Traceability</b>						
G-6.1	A documented traceability program shall be established.	<b>WP, R</b>	●	Records that enable reconciliation of product delivered to recipients (one step forward) shall be maintained except for direct to consumer sales. Records shall be maintained that link product with source of the produce or production inputs, e.g., soil amendments, fertilizers, seeds/transplants, agricultural chemicals, homemade preparations (one step backward). Records shall include the date of harvest, quantities, farm identification (field or block), transporter and non-transporter. Additional information may be included. Contents and retention of records shall be consistent with applicable regulations.	Auditor reviews traceability program and verifies Operation's ability to trace product accurately one step forward and one step back.	Operation establishes an effective traceability program.
G-6.1.a	Packaging must include product identification.			Operation must include product identification on all packaging. The product identification must include: 1) the origin of the producer; 2) the name and address of the producer; 3) the country of origin; and 4) the date of production or packaging.	Auditor reviews the product identification on all packaging.	Operation establishes product identification on all packaging.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-6.1.b	If product is intended for export, product meets labeling regulations of the country(ies) the product is being exported to.			Product shall be labeled according to the applicable regulations in the country(ies) in which the product is intended to be sold , if known during production.	Auditor reviews Operation's procedure for ensuring adherence to food labeling regulations in country(ies) of destination. If the country of destination is unknown during production, this item is not applicable.	Operation develops procedures, and diverts non-compliant product to a market in which the product meets standards.
G-6.2	A trace back and trace forward exercise shall be performed at least annually.	<b>R</b>		The trace back and trace forward exercise shall achieve accurate traceability within 4 hr or as required by applicable regulations. Trace exercise shall achieve 100% reconciliation of product to recipients.	Auditor reviews records of most recent trace exercise. If no trace exercise was performed in the past year, the Operation will perform the exercise during the audit.	Operation performs exercise and/or improves traceability program to achieve accurate reconciliation.
<b>G-7: Recall Program</b>						
G-7.1	A documented recall program, including written procedures, shall be established.	<b>WP, R</b>	●	The recall program shall have a designated recall team. A mock recall exercise shall be performed at least annually at the Operation being audited. The mock recall shall include the trace back and trace forward exercise and shall be completed as stated in the program and in compliance to applicable regulations.	Auditor reviews records of most recent mock recall performed at the Operation.	Operation develops recall team and recall plan, and tests the plan for effectiveness.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>G-8: Corrective Actions and Food Safety Incidents</b>						
G-8.1	The Operation shall have documented corrective action procedures.	<b>WP, R</b>	•	A documented Corrective Action is required for an observation or audit that contains a non-conformance with food safety requirements. The responsibility, methods, and timelines to address Corrective Actions shall be documented and implemented.	Auditor reviews corrective action procedures and examines records for evidence of compliance.	Operation develops and implements corrective actions procedures.
G-8.1.a	Corrective action procedures shall include a procedure to evaluate complaints.	<b>WP</b>		For the purpose of preventing recurrence, there shall be a documented corrective action procedure to evaluate food safety related complaints, and to investigate non-conformities. It shall include a plan to address the issue; a plan to prevent recurrence; and demonstration of the evidence of effectiveness. The time frame necessary for corrective action shall be documented. Objective evidence shall demonstrate that the procedure is effective.	Auditor shall verify the Operation has a procedure to evaluate complaints.	The Operation shall develop a procedure for evaluating complaints.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-8.1.b	Food safety incidents are recorded and assessed to determine severity and risk, and are addressed according to a documented food safety incident management procedure.	<b>R</b>		A food safety incident management procedure shall be in place. Relevant staff shall be aware of their obligations in case of an incident. Incidents which could lead to unsafe or non-conforming product are recorded and assessed in a timely manner to establish their severity and consumer risk. Corrective actions are taken and documented.	Auditor verifies Operation has a food safety incident management procedure, that food safety incidents are recorded and assessed, and risk is addressed by the Operation accordingly.	A food safety incident management mechanism will be implemented. Staff is trained to record and assess the severity of risk and to respond accordingly.
G-8.1.c	The documented incident management procedure is reviewed, tested and verified at least once a year.	<b>WP, R</b>		An annual review is conducted of the overall documented incident management procedure, including a review of records and corrective actions related to any food safety incidents that occurred. If there has been no food safety incident in the previous year, a mock incident management exercise has been conducted by the Operation to test the existing system. Any identified deficiencies in the incident management system have been corrected.	Auditors verify that the Operation has conducted an annual review of the Operation's incident management procedure. Auditor will verify records.	Operation implements an incident management review procedure which is tested and verified annually. Training of personnel responsible for implementing the incident management procedure may need to occur.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-8.1.d	Product which does not conform to food safety requirements is clearly identified and controlled.	<b>WP</b>	●	Operation has written procedures in place which outline how product which does not conform to food safety requirements will be handled to prevent unintended use or delivery.	Auditor shall review that written procedures are established and implemented for handling product which does not conform to food safety requirements.	The Operation shall establish and implement procedures for product that does not conform to food safety requirements.
<b>G-9: Self-Audits</b>						
G-9.1	The Operation shall have documented self-audit procedures.	<b>R</b>		Internal audits will be conducted at a minimum annually by an assigned individual utilizing this standard to assist in the self-audit. All aspects of the Operation's food safety plan will be audited and a written record of required corrective action will be documented.	Auditor reviews internal audit procedures and examines records for evidence of compliance.	Operation develops and implements internal audit procedures.
<b>G-10: Worker Health/Hygiene and Toilet/Handwashing Facilities</b>						
G-10.1	Operation shall have a policy for toilet, hygiene, and health.	<b>WP</b>	●	Each Operation shall establish written policies for their specific operations, which shall be in compliance with prevailing regulations for Worker Health and Hygiene Practices.	Auditor ensures that policies for toilet, hygiene and health exist.	Operation develops written policies covering toilets, hygiene and health.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-10.2	Employees and visitors shall be made aware of and follow all personal hygiene practices as designated by the Operation.		●	Operation's hygiene policies shall apply to all employees, contractors, visitors, buyers, product inspectors, auditors, and other personnel in the field. The Operation shall designate competent supervisory personnel to ensure compliance by all workers, visitors, and field personnel with the requirements in this section.	Auditor observes personnel in field for evidence of compliance. Auditor notes whether s/he was informed of the policy.	Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
G-10.3	Toilet facilities and restrooms shall be designed, constructed, and located in a manner that minimizes the potential risk for product contamination and are directly accessible for servicing.		●	Toilet and handwashing facilities are situated during operation and servicing, and maintained so as not to pose a hazard to the produce or other opportunity for contamination. Restrooms are located away from produce handling areas.	Auditor visually and by records verifies that toilet and handwashing facilities are not positioned, leaking or serviced in a manner that poses a risk of produce contamination.	Toilet or handwashing facility is replaced, repaired or repositioned to be compliant.
G-10.4	Toilet facilities shall be of adequate number, easily accessible to employees and visitors and in compliance with applicable regulations.		●	The Operation will have verification that the number of toilet facilities and their location relative to employees meets the more stringent of federal, state or local regulations.	Auditor verifies that the number of available toilet facilities and their location is compliant with prevailing regulation for the number of employees.	Operation obtains a sufficient number of toilet facilities to be compliant.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-10.5	The practice of disposing of used toilet tissue on the floor, in trash receptacles, or in boxes is prohibited.		•	Operation shall instruct employees that used toilet tissue shall only be disposed of in the toilet.	Auditor observes restrooms for evidence of compliance.	Retraining is performed and documented.
G-10.6	Toilet and wash stations shall be maintained in a clean and sanitary condition.	<b>R</b>	•	Toilet paper shall be available in toilet facility. Wash stations shall be located with the field sanitation units and include hand wash facilities with water that meets the microbial standard for drinking water, hand soap, disposable towels or other hand drying device, towel disposal container, and a tank that captures used hand wash water for disposal. These stations shall be provided inside or adjacent to toilet facilities. Restrooms shall include hand wash facilities with water that meets the microbial standard for drinking water, hand soap, disposable towels or other hand drying device, and towel disposal container. Gray water is plumbed or captured for disposal.	Auditor observes toilet and handwashing facilities for compliance. Auditor observes checklist or other evidence of a documented system for tracking cleaning of toilets.	Toilet or handwashing facility is replaced, repaired or maintained to be compliant.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-10.7	Personnel shall wash their hands at any time when their hands may be a source of contamination.		●	Personnel shall wash their hands prior to start of work, after each visit to a toilet, after using a handkerchief/tissue, after handling contaminated material, after smoking, eating or drinking, after breaks and prior to returning to work, after touching animals or waste and at any other time when their hands may have become a source of contamination. Antiseptic hand rubs may not be used as a substitute for soap (or other effective surfactant) and water.	Auditor observes compliance with personnel for evidence of compliance.	Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
G-10.8	Signage requiring handwashing is posted.			Signage in applicable languages and/or pictures shall be provided adjacent to hand wash facilities requiring people to wash their hands after each toilet visit.	Auditor verifies that signage is present adjacent to all hand wash facilities and is in appropriate language or pictures to clearly communicate requirements to all employees.	Operation obtains and posts signage to be compliant.
G-10.9	Clothing, including footwear, shall be effectively maintained and worn so as to protect product from risk of contamination.		●	Operation shall have a policy that employee clothing shall be clean at the start of the day and appropriate for the Operation.	Auditor reviews policy and observes compliance with Operation's policy.	Operation develops or revises clothing policy. Retraining is performed and documented.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-10.10	If gloves are used, the Operation shall have a glove use policy.		●	If rubber, disposable, cloth or other gloves are used in contact with product, the Operation shall have a glove use policy that specifies how and when gloves are to be used, cleaned, replaced and stored. Hands must be washed before putting on gloves. Policy shall be in compliance with current industry practices or regulatory requirements for that commodity.	If gloves are used, auditor observes glove use for compliance with the Operation's policy and current industry practices or regulatory requirements.	Operation develops or revises glove policy. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
G-10.11	If protective clothing is required by the Operation in product handling areas, it shall be handled in a manner to protect against contamination. When appropriate, racks and/or storage containers or designated storage area for protective clothing and tools used by employees shall be provided.			If protective clothing is used in proximity to product, the Operation shall have a policy or procedures for how and when protective clothing are to be used, cleaned, replaced and stored. The Operation shall have a policy for how the clothing and tools shall be stored when not in use so as to avoid potential contamination. Policy shall be in compliance with current industry practices or regulatory requirements for that commodity.	If protective clothing is used, auditor observes use for compliance with the Operation's policy and current industry practices or regulatory requirements. Auditor observes whether storage areas are designated, available and used.	Operation develops or revises protective clothing policy or procedures. Operation obtains and positions racks and storage containers as necessary. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-10.12	The wearing of jewelry, body piercings and other loose objects (e.g. false nails) shall be in compliance to company policy and applicable regulation.			Operation shall have a policy that personal effects such as jewelry, watches or other items shall not be worn or brought into fresh fruit and vegetable production areas if they pose a threat to the safety and suitability of the food. Policy shall be in compliance with current industry practices or regulatory requirements for that commodity.	Auditor observes personnel in field for evidence of compliance.	Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
G-10.13	The use of hair coverings shall be in compliance to company policy and applicable regulation.			The Operation shall have a policy that addresses use of hair coverings (e.g., hair nets, beard nets, caps), which is in compliance with prevailing regulation.	Auditor reviews the Operation's policy and observes employees for compliance.	Operation develops policy. Retraining is performed.
G-10.14	Employees' personal belongings shall be stored in designated areas.			Operation shall have a policy for when and how employee's personal belongings shall be stored so as not to be a source of product contamination.	Auditor observes personnel in field for evidence of compliance.	Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
G-10.15	Smoking, eating, chewing gum or tobacco, drinking (other than water), urinating, defecating or spitting shall be prohibited except in clearly designated areas.		●	Operation shall have policy prohibiting smoking, eating, chewing gum or tobacco, and drinking (other than water) except in designated areas. Such areas shall be designated so as not to provide a source of contamination. Operation shall have policy prohibiting spitting, urinating or defecating in any production area.	Auditor observes personnel for evidence of compliance.	Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-10.16	Operation shall have a written policy that break areas are located so as not to be a source of product contamination.	<b>WP</b>		Break areas shall be designated and located away from food contact/handling zones and production equipment.	Auditor observes break areas for evidence of compliance with Operation policy.	Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
G-10.17	Drinking water shall be available to all employees.	<b>R</b>		Drinking water, which meets drinking water standards, shall be easily accessible to field personnel and in compliance with applicable regulation. Bottled water or potable drinking water stations with single-use cups and a trash receptacle shall be available to all employees.	Auditor observes evidence of drinking water accessibility and Operation's evidence that water supplied to personnel meets drinking water standards.	Operation makes drinking water available to employees, in compliance with prevailing regulation.
G-10.18	Workers and visitors who show signs of illness shall be restricted from direct contact with produce or food-contact surfaces.	<b>WP</b>	•	Operation shall have a policy that restricts employees, contractors, visitors, buyers, product inspectors, auditors, and other personnel in the Operation who show signs of illness (e.g., vomiting, jaundice, diarrhea) from contact with product or food contact surfaces. Policy shall require that any person so affected immediately report illness or symptoms of illness to the management.	Auditor reviews policy and observes field personnel for evidence of compliance.	Operation develops and implements policy. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
G-10.19	Personnel with exposed cuts, sores or lesions shall not be engaged in handling product.		●	Minor cuts or abrasions on exposed parts of the body are acceptable if covered with a non-permeable covering, bandage or glove. Bandages on hands shall be covered with gloves in compliance with Operation's glove policy.	Auditor observes personnel in field for evidence of compliance.	Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
G-10.20	Operation shall have a blood and bodily fluids policy.	<b>WP</b>	●	There shall be a written policy specifying the procedures for the handling/ disposition of food or product contact surfaces that have been in contact with blood or other bodily fluids.	Auditor reviews policy and observes Operation for evidence of compliance.	Operation develops and implements policy. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
G-10.21	First aid kits shall be accessible to all personnel.			The kits shall be readily available in the vicinity of field work in the Operation and maintained in accordance with prevailing regulation. The kit materials shall be kept in a sanitary and usable condition.	Auditor observes that provisions exist for first aid kit to be readily available in vicinity of workers and is stocked in accordance with prevailing regulation.	Operation obtains and stocks a first aid kit and ensures it is readily accessible near field personnel.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>G-11: Waste Management</b>						
G-11.1	Operation has implemented a waste management plan.		●	Operation implements procedures for the control, storage and disposal of trash, litter, and waste in areas used for produce handling activities. Such procedures minimize the potential for trash, litter, or waste to attract or harbor pests and protect against contamination of produce, food contact surfaces, areas used for produce handling activities, water sources, and water distribution systems. Waste treatment and disposal systems operate so that they do not constitute a potential source of contamination in produce handling areas.	Auditor verifies the Operation has implemented a waste management plan.	Operation implements a waste management plan.
G-11.2	Trash shall not come in contact with produce.		●	Trash handling and removal shall not pose a hazard of contamination of produce.	Auditor reviews trash handling procedures for field operation, and observes trash handling practices for evidence of compliance.	Operation revises procedures. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>G-12: Food Defense</b>						
G-12.1.a	Initially and at least annually thereafter, the Operation shall evaluate and document the risks associated with security (food defense), including unintentional security risks.	<b>A</b>	●	A review or new assessment shall be conducted seasonally and any time there is a change made to the system or a situation occurs that provides the opportunity for the intentional or unintentional introduction of a hazard. The risk assessment shall address potential physical, chemical, and biological hazards.	Auditor reviews the risk assessment for completeness of consideration of potential hazards.	Operation develops or updates the risk assessment.
G-12.1.b	There shall be a written food defense plan to mitigate risks identified in the food defense risk assessment.	<b>WP, R</b>		The food defense plan shall include the following: preventive controls, monitoring and verification procedures, corrective actions, and documentation. The plan shall be reviewed following any changes made to the food defense risk assessment and adjusted accordingly to incorporate such changes. Evidence of management commitment to the food defense plan shall be documented. Training and/or retraining of personnel having oversight or performance duties shall be documented.	Auditor reviews the food defense plan for accuracy and completeness relative to the risk assessment.	Operation develops or updates the food defense plan.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>G-13: Food Fraud</b>						
G-13.1.a	The Operation shall initially and at least annually thereafter, evaluate and document the risks associated with food fraud.	<b>A</b>	●	A review or new assessment shall be conducted seasonally and any time there is a change made to the system or a situation occurs that could provide an opportunity for the misrepresentation of product.	Auditor reviews the risk assessment for completeness of consideration of potential hazards.	Operation develops or updates the risk assessment.
G-13.1.b	There shall be a written food fraud plan to mitigate risks identified in the food fraud risk assessment.	<b>WP, R</b>		The food fraud plan shall include the following: preventive controls, monitoring and verification procedures, corrective actions, and documentation. The plan shall be reviewed following any changes made to the food fraud risk assessment and adjusted accordingly to incorporate such changes. Evidence of management commitment to the food defense plan shall be documented. Training and/or retraining of personnel having oversight or performance duties shall be documented.	Auditor reviews the food fraud plan for accuracy and completeness relative to the risk assessment.	Operation develops or updates the food fraud plan.

## Field Operations and Harvesting (F)

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>F-1: Field History and Assessment</b>						
F-1.1	The food safety plan shall, initially and at least annually thereafter, evaluate and document the risks associated with land use history and adjacent land use including equipment and structures.	A	•	When land use history or adjacent land use indicates a possibility of physical, chemical or biological contamination, preventive controls shall be performed and documented to mitigate food safety risk. The assessment is re-performed, and documented, at least annually for environmental conditions or risk awareness that has changed since the last assessment. The assessment shall include indoor growing facilities and structures such as green houses and hydroponics.	Auditor reviews food safety plan to verify that risks associated with field history, adjacent land use and indoor growing facilities have been evaluated at least annually and preventive controls implemented for identified risks.	Operation evaluates and documents risks associated with land use history, adjacent land use, indoor growing facilities and implements preventive controls for identified risks.
F-1.1.a	Operation has performed and documented a risk assessment of each production area prior to the harvest of that location.	A	•	A system shall be established to maintain the record of agricultural activities undertaken at each production unit and records shall be available to demonstrate that sites (on farm and adjacent sites) have been evaluated with regards to potential food safety hazards.	Auditors verify the Operation has performed and documented a risk assessment of each production area.	The Operation shall perform and document a risk assessment for each production area. Training of appropriate personnel may need to take place to on conducting and recording this assessment.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-1.1.b	Operation has identified control measures for all significant hazards identified during risk assessment.	<b>WP</b>	•	Workers shall be trained on what the food safety hazards are and how to manage them. There shall be responsibilities assigned to maintain records on the food safety hazards and their management.	Auditor verifies that control measures for all significant hazards identified during the risk assessment are implemented.	Operation trains workers on the maintenance of the food safety hazards identified and how to manage and record the management of these hazards.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
F-1.2	For indoor growing and field storage buildings, building shall be constructed and maintained in a manner that prevents contamination of produce.		<ul style="list-style-type: none"> <li>●</li> </ul>	Building and equipment structures and surfaces (floors, walls, ceilings, doors, frames, hatches, etc.) shall be constructed in a manner that facilitates cleaning and sanitation and does not serve as harborage for contaminants or pests. Chill and cold storage loading dock areas shall be appropriately sealed, drained and graded. Fixtures, ducts, pipes and overhead structures shall be installed and maintained so that drips and condensation do not contaminate produce, raw materials or food contact surfaces. Water from refrigeration drip pans shall be drained and disposed of away from product and product contact surfaces. Drip pans and drains shall be designed to assure condensate does not become a source of contamination. Air intakes shall not be located near potential sources of contamination.	Auditor observes building and equipment for evidence that the building can be cleaned and maintained to prevent product contamination.	Building deficiencies are corrected. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-1.3	Sewage or septic systems are maintained so as not to be a source of contamination.		•	After a significant event (such as flooding or an earthquake) that could negatively impact a sewage or septic system, Operation takes appropriate steps to ensure that sewage and septic systems continue to operate in a manner that does not contaminate produce, food contact surfaces, areas used for produce handling, water sources, or water distribution systems.	If a significant event has occurred, Auditor reviews steps taken by Operation to verify sewage or septic system is not a source of contamination.	Sewage or septic systems deficiencies are corrected. Affected product is evaluated for potential contamination and disposition.
<b>F-2: Agricultural Chemicals /Plant Protection Products</b>						
F-2.a	The Operation has a current list of agricultural chemicals that are used and approved for the crops being grown.	<b>R</b>		An agricultural chemical list is available for the commercial brand names and active ingredient composition or beneficial organisms of agricultural chemicals (including post-harvest chemicals such as biocides, waxes and plant protection products), that are approved for crops being grown within the scope of the audit for the last 12 months.	Auditor shall verify the Operation's list of agricultural chemicals that are used and approved for the crop being grown and for crops grown within the scope of the audit for the last twelve months.	Operation will keep a list of agricultural chemicals used and approved.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-2.1	Use of agricultural chemicals shall comply with label directions and prevailing regulation.	<b>R</b>	●	Agricultural chemicals, including post-harvest chemicals such as biocides, waxes and plant protection products, must be registered for such use as required by prevailing regulation, and used in accordance with label directions including application rates, worker protection standards, personal protection equipment, container disposal, storage, and all requirements specified for the chemical or compound. Records of agricultural use are maintained.	Auditor reviews agricultural chemical use records for evidence of compliance with approved uses or label directions.	Operation develops and maintains agricultural chemical use records and maintains evidence of proper use of each chemical use. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
F-2.1.a	Agricultural chemical records include the target organism(s) and justification for application.	<b>R</b>		The name of the pest(s), disease(s) and/or weed(s) treated and justification for the application is documented in all agricultural chemical application records.	Auditors shall verify the Operation's records for agricultural chemicals used for target organism(s) and justification for application.	Operation will keep agricultural chemical records which include the target organism(s) and justification for application.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-2.1.b	Records of agricultural chemicals include the identity of the harvested crop, location, application dates, harvest dates, treatment, product name, and dose rate	<b>R</b>		Records of agricultural chemical applications shall be available and include: crop type and/or variety, location, application date, harvest dates, dose rate (a.i./ha), application rate (l/ha), product trade name, active ingredient and method of application.	Auditors shall verify that records for post-harvest biocides, waxes and plant protection products include the harvested crop, location, application dates, harvest dates treatment, product names, and dose rate. Auditors shall verify that the dates demonstrate compliance with the labeled pre-harvest interval, if applicable.	Operation shall include the harvested crop, location, application dates, harvest dates, treatment, product name, and dose rate of post-harvest biocides, waxes and plant protection products in their records.
F-2.1.c	Use of biological controls shall comply with label directions and prevailing regulation.	<b>R</b>		Only biological controls which are authorized for the cultivation of the specific crop will be used. Any biological control will be used according to the manufacturer's direction.	Auditor reviews biological controls use records for evidence of compliance with approved uses or label directions.	Operation develops and maintains biological controls use records and maintains evidence of proper use of each biological control. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-2.1.d	Operation keeps records of agricultural chemical applications used on nursery stock, transplants and other propagation material produced on site.	<b>R</b>		Records shall be available of the use of agricultural chemicals on propagation materials	Auditor shall verify Operation's records of agricultural chemical applications on propagation materials.	Operation keeps complete records of agricultural chemical applications on propagation materials.
F-2.2	If product is intended for export, agricultural chemical use, including post-harvest chemicals, shall consider requirements in the intended country of destination.			The Operation shall have procedures, such as pre-harvest interval and application rate, sufficient to meet the MRL entry requirements of the country(ies) in which the product is intended to be traded, if known during production.	Auditor reviews Operation's procedure for complying with agricultural chemical restrictions in countries of destination. If the country of destination is unknown during production, this item is not applicable.	Operation develops procedures, and diverts non-compliant product to a market in which the product meets standards.
F-2.3	Agricultural chemicals shall be applied by trained, licensed or certified application personnel, as required by prevailing regulation.	<b>R</b>		Operation maintains records demonstrating that all personnel responsible for chemical applications are trained and/or licensed, or supervised by licensed personnel, in compliance with prevailing regulation.	Auditor reviews records demonstrating that application personnel are licensed and/or trained in compliance with prevailing regulation.	Operation utilizes application personnel who are appropriately licensed and/or trained.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-2.3.a	Operator demonstrates knowledge of preparing and calculating agricultural chemical mixes.			The responsible person must be able to calculate and prepare the required application mix according to the label instructions and to prevent over or under application.	Auditors shall verify agricultural chemical mixes are calculated properly. Responsible person(s) for applying agricultural chemicals should be interviewed.	Retraining of responsible persons may be needed.
F-2.4	Water used with agricultural chemicals shall not be a source of product or field contamination.	<b>R</b>		Water used to dilute or deliver agricultural chemicals shall be from a source in compliance with the Water System Risk Assessment and Water Management Plan, consistent with current industry practices or regulatory requirements for that commodity.	Auditor reviews the Water System Risk Assessment for evidence that water used with agricultural chemicals has been considered, and that agricultural chemical use policies are in compliance with the Water System Risk Assessment.	Operation revises the Water System Risk Assessment. Operation uses a water source in compliance with the Water System Risk Assessment. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-2.4.a	Equipment used to apply agricultural chemicals shall be kept in good condition and calibrated annually to ensure accurate application.	<b>R</b>		The agricultural chemical application machinery has been verified for correct operation within the last 12 months and this is certified or documented either by participation in an official scheme (where it exists) or by having been carried out by appropriately trained and/or licensed (where required) personnel.	Auditors shall verify the Operation's records have been maintained within the last 12 months to ensure accurate application of agricultural chemicals. Observation should be made that application equipment is in good condition if maintained by the Operation.	Equipment used for application of agricultural chemicals will be brought to a level of good condition and records of its annual maintenance will be maintained by the Operation.
F-2.5	Agricultural chemical disposal shall not be a source of product or field contamination.	<b>R</b>		Operation shall have procedures for disposal of waste agricultural chemicals and for cleaning of application equipment that protects against contamination of product and growing areas.	Auditor reviews procedures and observes chemical handling records for evidence of compliance.	Operation develops and implements procedures. Steps are taken to mitigate any contamination events.
F-2.5.a	Agricultural chemicals approved for use on the crops being grown are stored separately from agricultural chemicals used for other purposes.	<b>R</b>		Only the agricultural chemicals currently in the approved agricultural chemicals list are kept in the storage area. Agricultural chemicals used for purposes other than application on crops within the rotation for the last 12 months are clearly identified and stored separately within the chemical storage area.	Auditors shall verify that only chemicals approved for use on crops being grown by the Operation are stored in a designated storage area.	Operation will establish a designated storage for approved agricultural chemicals for use on the crops being grown separated from agricultural chemicals used for other purposes.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>F-3: Water System Description</b>						
F-3.1	A water system description shall be available for review.	<b>WP</b>	●	Water sources and the production blocks they may serve shall be documented and current. The description shall include one or more of the following: maps, photographs, drawings (hand drawings are acceptable) or other means to communicate the location of water source(s), permanent fixtures and the flow of the water system (including holding systems, reservoirs or any water captured for re-use). Permanent fixtures include wells, gates, reservoirs, valves, returns and other above ground features that make up a complete irrigation system shall be documented in such a manner as to enable location in the field or in hydroponic, aeroponic or aquaponics operations.	Auditor reviews water system description or map, and verifies accuracy during inspection.	Operation develops or corrects the water system description or map.
F-3.2	The water source shall be in compliance with prevailing regulations.			Water shall be sourced from a location and in a manner that is compliant with prevailing regulations.	Auditor determines whether the water source is compliant with regulations relevant for the intended use of the water.	Operation discontinues use of the source until compliant with regulations. Affected produce is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-3.3	Water systems shall not be cross-connected with human or animal waste systems.		●	Water systems intended to convey untreated human or animal waste shall be separated from conveyances utilized to deliver water.	Auditor reviews water system for cross-connections with human or animal waste conveyances.	Operation discontinues use of the system until they are separated.
<b>F-4: Water System Risk Assessment</b>						
F-4.1	An initial risk assessment shall be performed and documented that takes into consideration the historical testing results of the water source, the characteristics of the crop, the stage of the crop, and the method of application.	<b>A</b>	●	A review or new assessment shall be conducted seasonally and any time there is a change made to the system or a situation occurs that could introduce an opportunity to contaminate the system. The risk assessment shall address potential physical, chemical, and biological hazards and hazard control procedures for the water distribution system.	Auditor reviews the risk assessment for completeness of consideration of potential hazards.	Operation develops or updates the risk assessment.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>F-5: Water Management Plan</b>						
F-5.1	There shall be a water management plan to mitigate risks associated with the water system on an ongoing basis.	<b>WP</b>	●	The water management plan shall include the following: preventive controls, monitoring and verification procedures, corrective actions, and documentation. The plan shall be reviewed following any changes made to the water system risk assessment and adjusted accordingly to incorporate such changes. Training and/or retraining of personnel having oversight or performance duties shall be documented.	Auditor reviews the water management plan for accuracy and completeness relative to the risk assessment.	Operation develops or updates the water management plan.
F-5.2	Water testing shall be part of the water management plan, as directed by the water risk assessment and current industry standards or prevailing regulations for the commodities being grown.	<b>WP</b>	●	As required, there shall be a written procedure for water testing during the production and harvest season, which includes frequency of sampling, who is taking the samples, where sample is taken, how the sample is collected, type of test and acceptance criteria. If all water is sourced from a municipal source, the municipal testing shall suffice. The frequency of testing and point of water sampling shall be determined based on the risk assessment and current industry standards or prevailing regulations for commodities being produced.	Auditor verifies that a water testing program is in compliance with the risk assessment and current industry standards or prevailing regulations and is included in the water management plan.	Operation develops a testing program consistent with risks identified in the risk assessment and with current industry standards or prevailing regulations for the commodities being produced.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-5.3	The testing program shall be implemented consistent with the water management plan.	<b>R</b>	●	Testing shall be performed and documented according to procedures described in the water management plan.	Auditor reviews testing records for compliance with the written plan.	Operation shall revise testing to be in compliance with the written plan. The corrective actions noted in the water management plan shall be followed until the conditions have been mitigated and the non-conformity has been resolved.
F-5.4	If water is treated to meet microbiological criteria, the treatment is approved and effective for its intended use, and is appropriately monitored.	<b>R</b>	●	Treatment is approved for its intended use (e.g., EPA-registered antimicrobial pesticide) and is delivered in a manner to ensure that the treated water is consistently safe and of adequate sanitary quality for its intended use and/or consistently meets the relevant microbial quality criteria. Treatment is monitored at a frequency adequate to ensure that the treated water is consistently safe and of adequate sanitary quality for its intended use and/or consistently meets the relevant microbial quality criteria.	Auditor verifies that water treatment is approved for its intended use, reviews documentation that it is used effectively to meet the intended microbiological criteria, and reviews monitoring records for compliance with the Operation's established procedure and acceptance criteria.	Operation discontinues use of unapproved treatments, uses approved treatments in an effective manner, and monitors the treatment at an adequate frequency.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-5.5	If post-harvest handling is used to achieve microbial criteria, Operation has documentation supporting its use.	<b>R</b>	●	If die-off or removal rates or other methods (e.g., commercial washing) are used to achieve microbial criteria of water used during growing, Operation has scientific data or information used to support its effectiveness. Documentation includes the specific time interval or log reduction applied, how the time interval or log reduction was determined, and the dates of corresponding activities such as the dates of last irrigation and harvest, the dates of harvest and end of storage, and/or the dates of activities such as commercial washing.	Auditor verifies documentation for completeness.	Operation obtains documentation on, or discontinues use of, unsupported methods, uses approved methods in an effective manner, and maintains required documentation.
F-5.6	If Operation uses an alternative approach to regulatory microbiological testing, Operation has scientific data or information to support the alternative.	<b>R</b>	●	If Operation uses an alternative testing method, frequency or criteria to regulatory requirements, Operation has documentation supporting the alternative.	Auditor verifies documentation for completeness.	Operation obtains documentation on, or discontinues use of, the alternative.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>F-6: Animal Control</b>						
F-6.1	The Operation has a written risk assessment on animal activity in and around the production area.	<b>A</b>	●	There shall be a written assessment of the growing fields and adjacent land, prior to each growing season, focusing on domestic and wild animal activity including grazing and feeding operations, noting crop characteristics, type and approximate number of animals, proximity to the growing field, water sources, and other relevant factors.	Auditor reviews the written assessment to ensure it has been performed for this season and is complete.	Operation performs and documents the assessment.
F-6.2	The Operation routinely monitors for animal activity in and around the growing area during the growing season.	<b>R</b>	●	There shall be scheduled monitoring of growing fields and adjacent land for evidence of animal activity. A frequency of monitoring and assessment shall be established based on production factors, such as the crop, geography, and other conditions.	Auditor reviews monitoring records to ensure the frequency of monitoring is consistent with the schedule.	Operation develops and implements a monitoring schedule.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-6.3	Based on the risk assessment, there shall be measures to prevent or minimize the potential for contamination from animals, including domesticated animals used in farming operations.	<b>WP, R</b>	●	The Operation shall have risk-appropriate actions to prevent or minimize the potential for contamination of produce with pathogens from animal feces, including from domesticated animals used in farming operations. There shall be a written record of any mitigation or corrective actions. Preventive measures and corrective actions shall comply with all local, state and federal regulations concerning animal control and natural resource conservation.	Auditor reviews preventive measures and corrective action plans.	Operation develops and implements risk-appropriate corrective actions for animal intrusions reasonably likely to contaminate produce in the field.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>F-7: Soil Amendments</b>						
F-7.1	The food safety plan shall address soil amendment risk, preparation, use, and storage.	<b>A, R</b>	●	If animal-based soil amendments or biosolids are used, records of composition, dates of treatment, methods utilized and application dates must be documented. Evidence of processing adequate to eliminate pathogens of human concern, such as letter of guarantee, certificate of analysis (COA) or any test results or verification data (e.g., time and temperature) demonstrating compliance with process or microbial standards, shall be documented. Such soil amendments must be produced, stored and applied in accordance with applicable federal, state, or local regulations.	Auditor reviews soil amendment records for completeness and evidence of compliance with prevailing regulations. If biosolids are used, it shall be noted.	Operation discontinues use of untreated, partially treated or undocumented animal-based soil amendments or biosolids. Operation develops and implements policies to obtain treatment information for all animal-based soil amendments.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-7.2	If a soil amendment containing raw or incompletely treated manure is used, it shall be used in a manner so as not to serve as a source of contamination of produce.	<b>R</b>	•	If such a product is used, there shall be documentation of the composition, and time and method of application. Such use will be consistent with current industry practices or regulatory restrictions for that commodity. Human waste shall not be used.	Auditor reviews records for any soil amendment use that may contain raw or incompletely treated manure.	Operation discontinues use, or develops and implements policies to safely use animal-based soil amendments that may contain raw or incompletely treated manure. Produce grown without such controls are either diverted to thermal-processed products or destroyed.
<b>F-8: Vehicles, Equipment, Tools and Utensils</b>						
F-8.1	Equipment, vehicles, tools utensils and other items or materials used in farming operations that may contact produce are identified.	<b>R</b>		Operation maintains a list of equipment, vehicles, tools, utensils and other items or materials that may pose a risk of produce contamination during normal use.	Auditor reviews the list for completeness.	Operation develops a list of equipment, vehicles, tools and utensils that may pose a risk of produce contamination during normal use.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-8.2	Equipment, vehicles, tools and utensils used in farming operations which come into contact with product are in good repair, and are not a source of contamination of produce.	<b>WP, R</b>	●	The Operation shall develop, implement, and schedule repair, cleaning, sanitizing, storage and handling procedures of all food contact surfaces to reduce and control the potential for contamination. Records must include the date and method of cleaning and sanitizing equipment. As necessary for food safety, vehicles and equipment shall be properly calibrated, operated, maintained, and used as intended. Equipment traffic flow is prevented from traveling through an untreated manure area into the harvesting field. These procedures shall be documented. Product contact tools, utensils and equipment shall be made of materials that can be cleaned and sanitized. Procedures include equipment and vehicles that are in the field infrequently.	Auditor observes production and harvest vehicles, equipment, tools and utensils which may come into contact with produce for evidence of food safety risks. Auditor reviews maintenance, cleaning and sanitation records that demonstrate compliance with procedures.	Operation develops maintenance, cleaning and sanitation procedures for equipment, vehicles, tools and utensils that may pose a risk for produce contamination. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-8.2.a	All equipment and instruments which have an effect on food safety shall be identified, adequately maintained and calibrated at a frequency sufficient to assure continuous accuracy.	<b>R</b>	•	The Operation shall have a list of equipment and instruments that have an effect on food safety (e.g. thermometers, pH meters, scales, chemical application or monitoring devices). This equipment shall be adequately maintained and calibrated at a frequency sufficient to assure continuous accuracy. A record of calibration shall be maintained.	Auditor reviews equipment and instrument list and calibration and records.	Operation develops a list of equipment and instruments. Calibration will be performed and recorded.
F-8.2.b	Calibration of equipment is traceable to a recognized standard.	<b>WP?</b>		Calibration of measuring and monitoring equipment (thermometers, pH meters, scales, chemical application or monitoring devices) is performed using a recognized standard or method.	Auditor reviews the calibration procedures to determine if they follow a recognized standard or method.	Operation develops calibration procedures which are traceable to a recognized standard or method.
F-8.3	Vehicles, equipment, tools and utensils shall be controlled so as not to be a source of chemical hazards.	<b>WP</b>		Operation shall have a written procedure to address the spills and leaks (fuel, oil, hydraulic fluids) which might occur during equipment operation in the field.	Auditor observes production and harvest vehicles, equipment, tools and utensils which may come into contact with produce for evidence of food safety risks.	Operation repairs leaks and cleans any food contact surfaces. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-8.4	Vehicles, equipment, tools and utensils shall be controlled so as not to be a source of physical hazards.			Operation has a glass and brittle plastic policy that addresses glass on production equipment and in growing area. Inspections performed in compliance with the policy shall be documented.	Auditor observes production and harvest vehicles, equipment, tools and utensils which may come into contact with produce for evidence of food safety risks and for compliance with the glass and brittle plastic policy.	Operation develops policy. Retraining is performed. Source of food safety risk is mitigated.
F-8.5	Cleaning and sanitizing procedures do not pose a risk of product contamination.			Equipment cleaning and sanitizing operations shall be conducted away from the product and other equipment to reduce the potential for contamination. Water used for cleaning and sanitizing shall meet the microbial standards for drinking water.	Auditor reviews cleaning and sanitizing procedures for steps to prevent contamination of produce, and observes Operation's evidence of compliance.	Operation develops and implements procedures. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
F-8.6	Water tanks are cleaned at a sufficient frequency so as not to be a source of contamination.	<b>WP</b>	●	There shall be a written procedure for cleaning water tanks, such as those used for dust control, the water from which may contact produce in the field.	Auditor reviews water tank cleaning procedures for steps to prevent contamination of produce, and observes Operation's evidence of compliance.	Operation develops and implements procedures. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>Harvesting</b>						
<b>F-9: Preharvest Assessment</b>						
F-9.1	A preharvest risk assessment shall be performed.	<b>A</b>	●	The Operation shall have a preharvest assessment procedure, which describes when the assessment is performed and that it includes an evaluation of conditions that may be reasonably likely to result in physical, chemical, or biological contamination of the produce, and demonstrates that the Operation is in compliance with the food safety plan. Results of the evaluation shall be documented.	Auditor reviews most recent preharvest assessment for completeness and consistency with the food safety plan.	Operation develops and implements a preharvest assessment procedure.
<b>F-10: Water/Ice Used in the Harvesting and Postharvest Operations</b>						
F-10.1	Operation has procedures for water used in contact with product or food contact surfaces.	<b>WP, R</b>	●	Standard Operating Procedures (SOPs), including water-change schedules, shall be developed for all uses of water. Microbial and/or physical/ chemical (e.g., test strips) testing shall be performed, as appropriate to the specific Operation, to demonstrate that acceptance criteria have been met.	Auditor observes evidence of existence of water use SOPs.	Operation develops the SOPs.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
F-10.2	Water use SOPs address the microbial quality of water or ice that directly contacts the harvested crop or is used on food-contact surfaces.	<b>R</b>	●	If water or ice directly contacts the harvested crop or is used on food-contact surfaces, such as in the field, as the final wash step prior to consumer packaging, or as a cooling aid in a consumer package, Operation's water use SOP requires that water or ice when applied meets the microbial standards for drinking water, as defined by prevailing regulation. Water may be treated (e.g., with chlorine) to achieve the microbial standards or to prevent cross-contamination. Ice and water shall be sourced/manufactured, transported, and stored under sanitary conditions. Special considerations or variances may be appropriate for some crops, e.g. cranberries and watercress, where deliberate flooding of the field is part of production and harvest practices.	Auditor reviews Operation's policy regarding water quality and its transport, and observes evidence that water or ice that contacts harvested crop or food contact surfaces meets the microbial standards for drinking water.	Operation discontinues using water or ice that does not meet the microbial standards of drinking water. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-10.3	Water use SOPs address treatment of re-circulated water, if used.	<b>R</b>	●	Operation's water use SOPs require re-circulated water to be treated using an approved antimicrobial to prevent it from becoming a source of contamination, according to prevailing regulation or industry specific standards for the commodity.	Auditor reviews water use SOP for completeness, and observes water treatment records for adequacy and consistency of treatment.	Operation discontinues using re-circulated water that is not treated sufficiently to prevent contamination of the produce. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
F-10.4	Water use SOPs address condition and maintenance of water-delivery system.	<b>R</b>	●	The water-delivery system shall be maintained so as not to serve as a source of contamination of produce, water supplies or equipment with pathogens, or to create an unsanitary condition.	Auditor reviews the SOP for inclusion of condition and maintenance of water-delivery system, and observes maintenance records for evidence of compliance.	Operation revises SOP and implements maintenance procedures.
F-10.5	If applicable to the specific commodity, water use SOPs address control of wash water temperature.	<b>R</b>		For produce demonstrated as being susceptible to microbial infiltration from wash water, wash water temperature differentials during immersion shall be considered.	If applicable to the commodity being washed, auditor reviews the SOP for inclusion of water temperature control, and observes monitoring records for evidence of compliance.	Operation revises SOP to address and control wash water temperature.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>F-11: Containers, Bins and Packaging Materials</b>						
F-11.1	Operation has written policy regarding storage of harvesting containers.	<b>WP</b>		Harvesting containers shall be stored in a manner so as not to serve as a source of contamination to the extent feasible and appropriate.	Auditor observes whether Operation has a policy regarding storage of harvesting containers used in the field. Auditor observes current practices for compliance with policy.	Operation develops the policy. Retraining is performed and documented.
F-11.2	Operation has written policy regarding inspection of food contact containers prior to use.	<b>WP</b>		Food-contact totes, bins, packing materials, other harvest containers, and pallets shall be visually inspected, clean, intact and free of any foreign materials prior to use. Containers shall be sufficiently maintained so as not to become a source of contamination.	Auditor observes whether Operation has a policy regarding inspection of food contact containers and observes current practices for compliance with policy.	Operation develops the policy. Retraining is performed and documented.
F-11.3	Operation has written policy regarding acceptable harvesting containers.	<b>WP</b>	●	The types and construction of harvest containers and packing materials shall be appropriate to the commodity being harvested and suited for their intended purpose.	Auditor observes whether Operation has a policy regarding what types of containers and packing materials are acceptable for use during harvest, and observes current practices for compliance with the policy.	Operation develops the policy. Retraining is performed and documented.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-11.4	Operation has written policy prohibiting use of harvest containers for non-harvest purposes.	<b>WP</b>	●	Food-contact totes, bins and other harvest containers designated for harvesting shall not be used for other purposes unless clearly marked or labeled for that purpose.	Auditor observes whether Operation has a policy prohibiting use of harvest containers for other uses unless otherwise labeled, and observes current practices for compliance with the policy.	Operation develops the policy. Retraining is performed and documented.
<b>F-12: Field Packaging and Handling</b>						
F-12.1	Operation shall have a written policy that visibly contaminated, damaged or decayed produce is not harvested, or is culled.	<b>WP</b>	●	Employees are trained that only sound produce appropriate for the intended use is harvested, and that produce that has been visibly contaminated or otherwise damaged to an extent that it poses a microbial food safety hazard is not harvested or is culled.	Auditor reviews written policy and evidence of employee training. Auditor inspects the harvest or sorting operation for evidence of compliance.	Operation develops the policy. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
F-12.2	Product that contacts the ground shall not be harvested unless the product normally grows in contact with the ground.	<b>WP</b>	●	Operation has considered and developed written policies regarding produce that comes in contact with the soil (e.g., drops) and to avoid, to the degree practicable, contact of cut surfaces of harvested produce with soil. Policy shall be consistent with industry standards or prevailing regulations.	Auditor reviews written policy and evidence of employee training. Auditor inspects the harvest or sorting operation for evidence of compliance.	Operation develops the policy. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-12.3	Harvest procedures shall include measures to inspect for and remove physical hazards.			Operation shall have procedures to detect glass/plastic breakage and remove possible physical contamination such as glass, metal, rocks, or other hazardous items, during harvesting operations.	Auditor inspects the harvest or sorting operation for evidence of hazard control.	Operation develops the procedure. Affected product is evaluated for potential contamination and disposition.
F-12.4	Cloths, towels, or other cleaning materials that pose a risk of cross-contamination shall not be used to wipe produce.			Operations shall not use cloths or other cleaning materials to clean produce, unless there is a procedure to prevent cross-contamination.	Auditor reviews whether Operation uses cloths or other produce cleaning materials and, if so, how Operation prevents cross-contamination between uses.	Operation ceases use of produce cleaning cloths, or develops procedure to prevent cross-contamination. Affected product is evaluated for potential contamination and disposition.
F-12.5	Packaging materials shall be appropriate for their intended use.		●	The product contact packaging shall be appropriate to the commodity being harvested and suited for its intended purpose.	Auditor observes evidence (e.g., information from supplier, customer specification, industry standards, prevailing regulation) that the packaging does not create an unsafe condition.	Operation discontinues use of the packaging until information can be obtained demonstrating safe use. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-12.6	Packaging shall be stored in a manner that prevents contamination.			Packaging storage shall be designed to maintain packaging dry, clean and free from dirt or residues so it remains fit for the purpose. Particular care shall be taken to prevent packaging from becoming a harborage for rodents and other vermin. Packaging shall be stored separately from hazardous chemicals, toxic substances and other sources of contamination.	Auditor inspects packaging storage area for evidence of compliance.	Operation designates a storage area and practices that reduce risk of contamination. Affected packaging is evaluated for potential contamination and disposition.
F-12.7	Operation has written policy regarding whether packing materials are permitted in direct contact with the soil.	<b>WP</b>		If produce is packed in field, Operation has considered and developed written policies regarding placement of packing materials directly on the soil, or whether a physical buffer (e.g., buffer bin or slip sheet) is required. Policy shall be consistent with industry standards.	Auditor observes whether Operation has a policy regarding placement of packing materials used in the field in direct contact with soil. Auditor observes current practices for compliance with policy.	Operation develops the policy. Retraining is performed and documented.
F-12.8.a	The Operation has implemented a product release procedure.	<b>WP</b>		Operations follow product release written procedure to ensure that all potential hazards have been addressed prior to transport. Release records must be kept.	Auditor observes product release procedure is being followed and release records are kept.	Operation develops a written release procedure. Release records are kept.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>F-13: Postharvest Handling and Storage (Field Prior to Storage or Packinghouse)</b>						
F-13.1	Harvested produce is handled in a manner such that it is not likely to become contaminated.		●	Operation has a policy, in compliance with current industry practices or regulatory requirements for that commodity, regarding handling, walking, stepping, or lying on harvested produce, food contact surfaces or packaging materials, or coming in contact with produce that has not been handled in compliance with these standards, or that may otherwise result in contamination.	Auditor reviews policy and produce handling practices for evidence of compliance.	Operation develops the policy. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
F-13.1.a	When product is field packed, collection, storage, and distribution points are maintained in a clean and hygienic condition.			Areas of collection/storage/distribution points shall be identifiable on farm during harvesting. There shall be visual evidence that these areas are kept clean. Where there is temporary storage on farm, rodent and other animal control measures shall be present.	Auditors shall verify through observation that when products are field packed, collection, storage and distribution points are maintained in a clean and hygienic condition.	Operation will implement practices that during field packing of produce that collection, storage and distribution points are maintained in a clean and hygienic condition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-13.2	Materials that come in contact with the produce shall be clean and in good repair.		●	Operation has a policy that pallets, produce bins, totes and materials that come in contact with the produce or the containers during handling or storage shall be cleaned and, if practicable, sanitized sufficient so as not to be a source of contamination.	Auditor observes current practices for compliance with policy.	Operation develops the policy. Retraining is performed and documented. Affected materials are evaluated for potential contamination and disposition.
F-13.3	Harvested produce shall be stored separately from chemicals which may pose a food safety hazard.		●	Chemicals, including cleaning and maintenance compounds shall be stored in an area separate from harvested produce.	Auditor observes produce storage area for evidence of compliance.	Operation designates a storage area and practices that reduce risk of contamination. Affected produce is evaluated for potential contamination and disposition.
<b>Transportation (Field to Storage or Packinghouse)</b>						
<b>F-14: Equipment Sanitation and Maintenance</b>						
F-14.1	The Operation shall have a policy, written procedures, and a checklist to verify cleanliness and functionality of shipping units (e.g., trailer).	<b>WP, R</b>	●	Shipping units shall be clean, functional and free of objectionable odors before loading, in compliance with current industry practices or regulatory requirements for that commodity. Refrigeration units, if used, must be in working order.	Auditor reviews cleaning and inspection procedures and inspects produce transport vehicles for cleanliness.	Operation develops the policy. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
F-14.2	Loading/unloading procedures and equipment shall minimize damage to and prevent contamination of produce.			Personnel responsible for the loading and unloading of produce shall take steps to minimize the potential of physical damage to produce, which can introduce and/or promote the growth of pathogens. Loading/unloading equipment shall be clean and well maintained and of suitable type to avoid contamination of the produce.	Auditor observes loading/unloading procedures for evidence of practices that result in excessive damage to produce. Auditor observes loading/unloading equipment for suitability and condition.	Operation revises procedures. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

**Post-Harvest Operations (P)**

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>P-1: Produce Sourcing</b>						
P-1.1	The Operation has a policy and takes affirmative steps to ensure that all fresh produce that are packed or stored in the Operation are grown following requirements in <i>Field Operations and Harvesting</i> harmonized standard.	<b>R</b>		The Operation requires all raw product suppliers to provide evidence of food safety/GAP programs and compliance. Such evidence must include sufficient documentation to demonstrate that the supplier complies with the requirements in <i>Field Operations and Harvesting</i> harmonized standard.	Auditor reviews policy and verifies that Operation’s evidence of supplier compliance with food safety/GAP programs is in compliance with the Operation’s policy.	Operation obtains required documentation. Operation ceases accepting or shipping product from non-approved suppliers, until sufficient documentation demonstrating compliance is received by the Operation.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>P-2: Agricultural Chemicals</b>						
P-2.1	Use of agricultural chemicals shall comply with label directions and prevailing regulation.	<b>R</b>	●	Agricultural chemicals applied post-harvest (e.g., biocides, waxes and plant protection products) must be registered for such use as required by prevailing regulation, and used in accordance with label directions including application rates, worker protection standards, personal protection equipment, container disposal, storage, and all requirements specified for the chemical or compound. Records of use are maintained.	Auditor reviews post-harvest agricultural chemical use records for evidence of compliance with approved uses or label directions.	Operation develops and maintains agricultural chemical use records and maintains evidence of proper use of each chemical use. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
P-2.2	If product is intended for export, pre- and post-harvest agricultural chemical use shall consider requirements in the intended country of destination.			The Operation shall have procedures, such as review of pre-harvest intervals and adjustment of post-harvest application rates, sufficient to meet the MRL entry requirements of the country(ies) in which the product is intended to be traded, if known during post-harvest handling.	Auditor reviews Operation's procedure for complying with agricultural chemical restrictions in countries of destination. If the country of destination is unknown during post-harvest handling, this item is not applicable.	Operation develops procedures, and diverts non-compliant product to a market in which the product meets standards.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-2.3	Agricultural chemicals shall be applied by trained, licensed or certified application personnel, as required by prevailing regulation.	<b>R</b>		Operation maintains records demonstrating that all personnel responsible for chemical applications are trained and/or licensed, or supervised by licensed personnel, in compliance with prevailing regulation.	Auditor reviews records demonstrating that application personnel are licensed and/or trained in compliance with prevailing regulation.	Operation utilizes application personnel who are appropriately licensed and/or trained.
<b>P-3: Facility</b>						
P-3.a	Operation has performed and documented a risk assessment of the packinghouse.	<b>A</b>	•	Records shall be available to demonstrate that the packinghouse has been evaluated with regards to potential food safety hazards.	Auditors verify the Operation has performed and documented a risk assessment of the packinghouse.	The Operation shall perform and document a risk assessment for the packinghouse. Training of appropriate personnel may need to take place to on conducting and recording this assessment.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-3.b	If the risk assessment shows the need for identifying critical control point(s) (CCP) in the packinghouse, a documented HACCP plan or additional procedures addressing monitoring of control points and disposition of non-conforming products must be in place. The HACCP plan or additional policies must be documented and implemented.	<b>WP, R</b>	•	If the need for CCPs is identified in the risk assessment, the Operation shall have a HACCP plan or documented detailed procedures which cover monitoring, documentation, product testing etc. This should include instructions to follow when there is a loss of control of a CCP so that adjustments can be made in a timely manner as well as withholding of product that is out of compliance, if necessary. If changes are made to the process, equipment, etc., all HACCP systems or procedures should be reviewed and the food safety coordinator should inform all employees involved.	Auditors shall review records to verify procedures are being followed correctly. Employees should have a basic understanding of what HACCP is in general and also how it applies to their operations. Employees should also have a good understanding of the details of the CCPs that they have been assigned to monitor.	Detailed procedures are developed and re-training or educational sessions may be necessary.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-3.1	Building shall be constructed and maintained in a manner that prevents contamination of produce during staging and cooling.		•	Building and equipment structures and surfaces (floors, walls, ceilings, doors, frames, hatches, etc.) shall be constructed in a manner that facilitates cleaning and sanitation and does not serve as harborage for contaminants or pests. Chill and cold storage loading dock areas shall be appropriately sealed, drained and graded. Fixtures, ducts, pipes and overhead structures shall be installed and maintained so that drips and condensation do not contaminate produce, raw materials or food contact surfaces. Water from refrigeration drip pans shall be drained and disposed of away from product and product contact surfaces. Drip pans and drains shall be designed to assure condensate does not become a source of contamination. Air intakes shall not be located near potential sources of contamination.	Auditor observes building and equipment for evidence that the building can be cleaned and maintained to prevent product contamination.	Building deficiencies are corrected. Affected product is evaluated for potential contamination and disposition.
P-3.2	Adequate lighting shall be provided in all areas.			Lighting in all areas shall be sufficient to enable cleaning, sanitation, repairs, etc.	Auditor observes, directly or by other evidence, that sufficient lighting is provided to the worker to clearly see the task being performed.	Operation installs adequate, lighting.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-3.3	Only essential glass and brittle plastic shall be present in the building.	<b>R</b>		Light bulbs, fixtures, windows, mirrors, skylights and other glass and brittle plastic in the building or in the product path entering or exiting the building shall be of the safety type, or shall be otherwise protected to prevent breakage. If glass or brittle plastic must be used, there shall be a written glass and brittle plastic control policy, including a glass and brittle plastic register.	Auditor observes glass and brittle plastic use in building, and glass and brittle plastic control policy and glass and brittle plastic register for compliance.	Operation develops a glass and brittle plastic control policy or eliminates all glass and brittle plastic in the building.
P-3.4	Catwalks above product zones are protected to prevent produce or packaging contamination.			Where workers walk over product contact surfaces, those walkways are solid surface or have catch trays installed, are protected by kick plates, product covers or other barriers.	Auditor observes catwalks over product zones for evidence of protective measures.	Operation retrofits catwalks or product zones to protect against potential contamination. Affected product is evaluated for potential contamination and disposition.
P-3.5	Operation has procedures to prevent pest harborage in any equipment stored near the building.			Equipment stored outside is stored away from the building perimeter. Equipment is not to accumulate near the building. Bone yards are located away from the building. Outside equipment storage areas are included in pest control program.	Auditor observes outside equipment storage areas for evidence of compliance.	Operation includes outside storage areas in pest control program. Equipment is moved to be in compliance.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-3.6	If applicable, Operation has a written Allergen Control Program.	<b>A, WP</b>	•	The Allergen Control Program lists the allergens in use or storage at the Operation specific to country regulations. If applicable, procedures address identification and segregation of allergens during storage and handling as based on a risk assessment conducted by the Operation.	Auditor reviews Allergen Control Program and inspects Operation for evidence of allergen use and storage.	Operation develops and implements an Allergen Control Program or eliminates allergens from the Operation.
<b>P-4: Pest and Animal Control</b>						
P-4.1	Operation has procedures to manage pests to the extent appropriate to the Operation.	<b>WP</b>	•	Operation has a written pest control program, performed by a trained pest control operator (or licensed where required by prevailing regulation). The written program includes policies and procedures applicable to that Operation, such as storage of outside equipment or other factors dealing with pest harborages, and maps of the location of pest traps outside and inside the Operation. Operation maintains a pest-control log that includes dates of inspection, inspection reports and steps taken to eliminate any problems. Applications of pesticides (e.g., insecticides, rodenticides) shall be performed in compliance with local, state, and federal pesticide regulations.	Auditor reviews pest control program, pest control operator's credentials, and inspects Operation for pest activity.	Operation develops, documents and implements an effective pest control program.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-4.2	Operation restricts animals from food handling areas.		•	Domesticated animals are prohibited from pack house, cooling, and storage facilities unless procedures are in place for their safe presence. Procedures are in place to exclude wild and feral animals to the degree practical and to monitor for and mitigate contamination from animal excreta.	Auditor looks for evidence of animals or animal activity.	Operation develops, documents and implements an effective animal control program.
P-4.3	If used, pest control devices, including rodent traps and electrical flying insect devices, are located so as to not contaminate produce or food handling surfaces.			Only non-toxic traps and pest control devices are used inside the packing house or storage building.	Auditor reviews pest control program and placement of pest control devices.	Operation removes or repositions pest control devices to be compliant.
<b>P-5: Equipment, Tools and Utensils</b>						
P-5.1	All food contact equipment, tools and utensils are designed and made of materials that are easily cleaned and maintained.		•	The Operation shall develop, implement, and schedule repair, cleaning, sanitizing, storage and handling procedures of all food contact surfaces to reduce and control the potential for contamination. These procedures shall be documented. Product contact tools, utensils and equipment shall be made of materials that can be cleaned and sanitized.	Auditor observes food contact surfaces for design and materials that can be easily cleaned and maintained. Auditor reviews cleaning, sanitizing, storage and handling procedures.	Operation develops and implements procedures. Operation replaces all non-compliant food contact equipment, tools and utensils.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-5.2	Equipment is installed in a way that provides access for cleaning.			Cooling, packing and other food contact equipment is installed away from walls and otherwise positioned so as not to inhibit access for proper cleaning.	Auditor observes positioning of all food contact equipment for compliance.	Operation relocates the equipment to be compliant.
P-5.3	Equipment lubrication is managed so as not to contaminate food products.			Only food-grade lubricants are used on food processing and packaging equipment, or on any other equipment where incidental food contact may occur, unless the equipment manufacturer specifies only a non-food grade lubricant. Lubricant leaks are fixed or catch pans are installed to prevent product contamination.	Auditor reviews purchase or maintenance records to verify all lubricants used are food grade. Auditor observes lubrication points to verify leaks are controlled.	Operation replaces non-food grade lubricants. Operation fixes lubricant leaks or installs catch pans. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-5.4	All instruments used to measure temperature, pH, antimicrobial levels and or other important devices used to monitor requirements in this section shall be adequately maintained and calibrated at a frequency sufficient to assure continuous accuracy.	<b>R</b>	•	Records shall be kept. If an ORP system is used, an independent measurement shall be used to verify compliance. Test methods or test strips used to monitor requirements shall be appropriate to their use, sufficiently sensitive to their intended purpose and available in adequate numbers for their designated use.	Auditor reviews calibration and verification procedures and records.	Operation develops, documents and implements calibration and verification procedures and records.
P-5.4.a	Calibration of equipment is traceable to a recognized standard.	<b>WP?</b>		Calibration of measuring and monitoring equipment (thermometers, pH meters, scales, chemical application or monitoring devices) is performed using a recognized standard or method.	Auditor reviews the calibration procedures to determine if they follow a recognized standard or method.	Operation develops calibration procedures which are traceable to a recognized standard or method.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-5.5	Foreign material control devices are inspected and maintained.	<b>R</b>		If included in the Food Safety Plan, foreign material control devices shall be included as part of a Preventive Maintenance Schedule or other program and maintained to ensure effective operation. Calibration checks shall be performed according to written procedure or manufacturer's recommendations.	Auditor inspects any foreign material control devices and maintenance and calibration check records for compliance.	Operation develops written procedures for inspection, calibration checks and maintenance of foreign material control devices. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
P-5.5.a	Metal detection equipment, if utilized, shall be checked at a scheduled frequency as outlined in the Operation's food safety/HACCP plan using iron, non-iron and stainless steel testing wands.	<b>R</b>		These systems should be frequently checked to ensure that they are working correctly (recorded). Foreign material issues should be noted and corrective actions implemented as written in the food safety program.	Auditors shall review equipment records to ensure frequency is according to established food safety plan.	Procedure is developed and implemented at an established frequency. Training is implemented.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>P-6: Maintenance and Sanitation</b>						
P-6.1	A Preventive Maintenance and/or Master Cleaning Schedule, with related SOPs, shall be established.	<b>WP, R</b>	●	There is a written cleaning and sanitation schedule for all food and non-food contact surfaces including floors, drains, walls, ceilings and other surfaces that may pose a source of product contamination. Roof leaks shall be promptly identified, controlled and repaired. Operation has procedures for cleaning and sanitation of cooling equipment. Drip pans and drains shall be maintained to assure condensate does not become a source of contamination.	Auditor reviews Preventive Maintenance and/or Master Cleaning Schedule, observes building and equipment for evidence that the building is cleaned and maintained to prevent product contamination. Auditor reviews building maintenance records for evidence of repairs.	Operation develops a Preventive Maintenance and/or Master Cleaning Schedule, with related SOPs. Building deficiencies are corrected. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
P-6.2	Any temporary repairs on food contact surfaces are constructed of food-grade material. Operation has a procedure to ensure that permanent repairs are implemented in a timely manner.			Operation has procedures to ensure temporary repairs are compliant with all food safety requirements, and do not create potential sources of chemical, microbiological or physical contamination. Permanent repairs are implemented as soon as practical; Operation establishes timelines and responsibilities for completion.	Auditor observes temporary repairs, if present, and Operation's plans for timely completion.	Operation develops and implements a temporary repair procedure. Operation immediately fixes any non-compliant temporary repairs. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-6.3	All cleaning agents shall be approved for their intended use on food contact surfaces.			All chemicals used for cleaning or sanitizing of food contact equipment, tools, utensils, containers and other food contact surfaces shall be approved for that use, according to the chemical manufacturer or supplier and all federal, state and local requirements, and shall be used in a manner consistent with the approved use.	Auditor reviews cleaning and sanitizing chemicals purchasing practices or procedures, storage area, and use procedures to verify compliance.	Operation ceases use of unapproved chemicals. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
P-6.4	Cleaning equipment and tools are clean, in working order and stored properly away from product handling areas.			Equipment, utensils and tools used for cleaning or sanitizing, including food contact and non-food contact surfaces, are maintained in a manner sufficient to avoid becoming a source of produce contamination and are stored away from product handling areas.	Auditor reviews practices or procedures for use and storage of cleaning and sanitizing equipment, tools and utensils, and observes storage area for compliance.	Operation develops written procedures for maintaining and storing cleaning and sanitizing equipment, tools and utensils. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-6.5	Food contact surfaces shall be cleaned, sanitized and maintained according to the Food Safety Plan	<b>R</b>	●	Prior to use, the lines used for washing, grading, sorting, or packing shall be cleaned and sanitized as appropriate per risk assessment or prevailing regulations. Records must include the date and method of cleaning and sanitizing equipment. When in use, the lines shall be maintained so as not to be a source of contamination with pathogens.	Auditor reviews cleaning and sanitizing procedures and records and observes food contact surfaces to verify compliance.	Operation develops written cleaning and sanitizing procedures and records consistent with the Food Safety Plan. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
P-6.6	Transporting equipment shall be maintained to prevent contamination of products being transported.	<b>R</b>	●	Pallet jacks, carts, trolleys and forklifts, shall be maintained to prevent contamination of products being transported and are listed on the Preventive Maintenance and/or Master Cleaning Schedules.	Auditor observes transporting equipment and reviews Schedules and records for evidence of compliance.	Operation develops and implements Preventive Maintenance and/or Master Cleaning Schedules.
P-6.7	Waste materials and their removal are managed to avoid contamination.		●	Trash, leaves, trim, culls, waste water and other waste materials are removed from the produce handling areas at a frequency sufficient to avoid becoming a source of produce contamination.	Auditor observes waste control procedures in produce handling areas.	Operation develops a written waste control procedure. Operational deficiencies are corrected. Retraining is performed and documented.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-6.8	Outside garbage receptacles/dumpsters are closed and located away from building entrances and the area around such sites is reasonably clean.			Waste containers and compactors are located away from produce handling areas, are closed or have lids (except for waste collection/cull trailers in active use), are emptied on a scheduled basis or as needed, and weeds and other pest harborage are minimized around the containers.	Auditor observes waste container location and management practices.	Operation relocates waste containers. Building deficiencies are corrected. Retraining is performed and documented.
P-6.9	The plant grounds are reasonably free of litter, waste culls, vegetation, debris and standing water.			Operation has procedures to maintain the grounds surrounding the building in a manner to minimize sources of contamination, such as litter, vegetation, waste culls, debris and standing water that may be pest attractants or harborages. Vegetation that does not serve as an attractant or harborage is permitted.	Auditor observes the grounds for compliance.	Operation removes the attractants and harborages, and develops procedure to maintain grounds in compliance.
P-6.10	Sewage or septic systems are maintained so as not to be a source of contamination.		●	After a significant event (such as flooding or an earthquake) that could negatively impact a sewage or septic system, Operation takes appropriate steps to ensure that sewage and septic systems continue to operate in a manner that does not contaminate produce, food contact surfaces, areas used for produce handling, agricultural water sources, or agricultural water distribution systems.	If a significant event has occurred, auditor reviews steps taken by Operation to verify sewage or septic system is not a source of contamination.	Sewage or septic systems deficiencies are corrected. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-6.11	The sewage disposal system is adequate for the process and maintained to prevent direct or indirect product contamination.		•	The human waste and gray water sewage system has sufficient capacity to handle the Operation's peak flows and not cause direct or indirect product contamination. Cross-connections with product contact water systems are prohibited.	Auditor observes Operation for evidence of compliance.	Operation suspends operation until sewage disposal system functions so as to prevent risk of product contamination. Affected product and product handling areas are evaluated for potential contamination and disposition.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>P-7: Post-Harvest Water/Ice</b>						
P-7.1	A water system description shall be prepared.	<b>R</b>	●	<p>Water sources and the Operations they serve shall be documented and current. The description shall include one or more of the following: maps, photographs, drawings (hand drawings are acceptable) or other means to communicate the location of water source(s), permanent fixtures and the flow of the water system (including holding systems, reservoirs or any water captured for re-use). Permanent fixtures include wells, gates, reservoirs, valves, returns, backflow prevention and other above ground features that make up a complete water distribution system shall be documented in such a manner as to enable location in the Operation.</p>	Auditor reviews water system description or map, and verifies accuracy during Operation inspection.	Operation develops or corrects the water system description or map.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-7.2	Documented scheduled assessment of water system including delivery equipment shall be performed.	<b>R</b>	●	The water-delivery system shall be maintained so as not to serve as a source of contamination of produce, water supplies or equipment with pathogens, or to create an unsanitary condition. Water installations and equipment are constructed and maintained to prevent back siphonage backflow and cross connections between product contact water and waste water. Routine checks verify that back siphonage and backflow prevention units are functioning properly (annual or as needed to maintain continuous protection). Results are documented.	Auditor reviews maintenance records and examines water system for compliance with water system maintenance program, including backflow prevention and cross-connections.	Operation corrects deficiencies in ability of water system to reliably distribute safe water and schedules water system assessments. Affected product is evaluated for potential contamination and disposition.
P-7.3	Water use SOPs address the microbial quality of water or ice that directly contacts the harvested crop or is used on food-contact surfaces.	<b>R</b>	●	If water or ice directly contacts the harvested crop or is used on food-contact surfaces, Operation's water use SOP requires that water or ice when applied meets the microbial standards for drinking water, as defined by prevailing regulation or the country in which the product is intended to be traded, whichever is more stringent. Water may be treated (e.g., with chlorine) to achieve the microbial standards or to prevent cross-contamination. Ice and water shall be sourced/manufactured, transported, and stored under sanitary conditions.	Auditor reviews Operation's policy regarding water quality and its transport, and observes evidence that water or ice that contacts harvested crop or food contact surfaces meets the microbial standards for drinking water.	Operation discontinues using water or ice that does not meet the microbial standards of drinking water. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-7.4	Operation's Food Safety Plan includes produce washing process, if used.	<b>A, WP</b>	●	If produce is washed, an initial risk assessment of the washing process shall be performed that takes into consideration the commodity, type of wash system, type of sanitizer, and water quality.	Auditor reviews Food Safety Plan and operational procedures to determine if washing process has been considered.	Operation revises Food Safety Plan to include produce washing process.
P-7.5	If used, water antimicrobial treatments shall be monitored sufficiently to assure continuous control.	<b>R</b>	●	Microbial, physical or chemical testing shall be performed, as appropriate to the specific Operation, to demonstrate that acceptance criteria have been met.	Auditor reviews monitoring records for compliance with the Operation's established procedure and acceptance criteria.	Operation establishes monitoring program that assures continuous control of water antimicrobial treatment to meet acceptance criteria.
P-7.6	Re-circulated water that contacts product or food contact surfaces shall be treated using an approved antimicrobial process or chemical treatment.		●	Re-circulated water shall be treated using an antimicrobial treatment sufficient to prevent cross-contamination. Treatments shall be in compliance with prevailing regulation or the country in which the product is intended to be traded, whichever is more stringent.	Auditor reviews water treatment process and evidence of compliance with regulation and the Operation's established procedure.	Operation suspends operation until water treatment functions so as to prevent risk of product contamination. Affected product and product handling areas are evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-7.7	Operation has documentation demonstrating regulatory approval of the wash water antimicrobials in use.	<b>R</b>		Only wash water antimicrobials or antimicrobial systems registered or approved by EPA, FDA or the prevailing regulatory agency for their specific intended use may be used in the dump tank wash water, on the spray line or other food contact purposes.	Auditor reviews documentation for appropriateness of use.	Operation obtains documentation or discontinues use of the antimicrobial system and implements use of appropriate antimicrobial system. Affected product is evaluated for potential contamination and disposition.
P-7.8	If wash water antimicrobial is used, it shall be used in accordance with established operational procedure and manufacturer instructions.	<b>R</b>		Records shall be kept. Operation shall have a procedure that includes minimum limits for antimicrobial in wash water for food safety. Procedure shall include how to control, monitor and record use of wash water antimicrobial as needed to assure compliance with minimum limits. Operation shall have a procedure as to what corrective actions are taken if criteria are not met.	Auditor reviews operational procedures and antimicrobial use and corrective actions records for compliance.	Operation develops, documents and implements procedures for use of the antimicrobial system in compliance with manufacturer instructions. Affected product is evaluated for potential contamination and disposition.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-7.9	If applicable to the specific commodity, water use SOPs address control of immersion water temperature.	<b>R</b>		For produce that is immersed in water and demonstrated as being susceptible to microbial infiltration from water, water temperature differentials during immersion shall be controlled in accordance with prevailing regulation or industry guidelines.	If applicable to the commodity being immersed, auditor reviews the SOP for inclusion of water temperature control, and observes monitoring records for evidence of compliance.	Operation revises SOP to address and control water temperature.
P-7.10	Water-change schedules shall be developed for all uses of water where water is re-used.			Operation shall have procedures for changing water that is re-used, such as recirculated water, flumes and dump tanks.	Auditor observes water use procedures and evidence of compliance.	Operation develops water use procedures. Affected product is evaluated for potential contamination and disposition.
P-7.11	Debris, damaged and/or visibly contaminated produce shall be removed from wash areas/dump tanks to the extent possible.			Operation has procedures to determine how and when debris, damaged and/or visibly contaminated produce shall be removed from wash areas/dump tanks.	Auditor reviews procedures and observes wash areas for evidence of compliance.	Operation develops, documents and implements a wash area control program. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>P-8: Containers, Bins and Packaging</b>						
P-8.1	Specifications for all packaging materials that impact on finished product safety shall be provided and comply with prevailing regulations.	<b>R</b>		The methods and responsibility for developing and approving detailed specifications and labels for all packaging shall be documented. A register of packaging specifications and label approvals shall be maintained and kept current.	Auditor reviews documentation on methods and responsibilities for packaging materials and label approvals.	Operation revises labels and packaging materials to be compliant with prevailing regulations.
P-8.2	Operation has written policy regarding storage and post-storage handling of product-contact containers.	<b>WP</b>		Product-contact containers, as appropriate to the specific Operation (e.g., harvest bins, totes, crates, sacks, buckets, finished product clam shells, bags or packaging films), shall be stored, or handled (e.g., cleaned prior to post-storage use), in a manner so as not to serve as a source of contamination.	Auditor observes whether Operation has a policy regarding storage and handling of product-contact containers used in the Operation. Auditor observes current practices for compliance with policy.	Operation develops the policy. Retraining is performed and documented.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-8.3	Operation has written policy regarding whether product-contact containers are permitted in direct contact with the ground.	<b>WP</b>		If produce does not normally contact the ground during production, Operation has considered and developed written policies regarding placement of product-contact containers directly on the ground, or whether a physical buffer (e.g., buffer bin or slip sheet) is required, or use of containers constructed to prevent contact of the produce or produce contact surfaces with the ground. Policy shall be consistent with industry standards.	Auditor observes whether Operation has a policy regarding placement of product-contact containers in direct contact with the ground. Auditor observes current practices for compliance with policy.	Operation develops the policy. Retraining is performed and documented.
P-8.4	Operation has written policy regarding inspection of food contact containers and bins prior to use.	<b>WP</b>		Food-contact totes, bins, packing materials, other harvest containers, and pallets shall be visually inspected, clean, intact and free of any foreign materials prior to use. Containers shall be sufficiently maintained so as not to become a source of contamination.	Auditor observes whether Operation has a policy regarding inspection of food contact containers and observes current practices for compliance with policy.	Operation develops the policy. Retraining is performed and documented.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-8.5	Operation has written policy regarding acceptable product-contact containers.	<b>WP</b>	•	The types and construction of product-contact containers and packing materials shall be appropriate to the commodity being handled and suited for their intended purpose. Produce shall only be stored in clean and sanitary containers.	Auditor observes whether Operation has a policy regarding what types of containers and packing materials are acceptable for use, and observes current practices for compliance with the policy.	Operation develops the policy. Appropriate product-contact containers are obtained. Affected product is evaluated for potential contamination and disposition.
P-8.6	Operation has written policy prohibiting use of product-contact containers for non-product purposes unless clearly marked or labeled for that purpose.	<b>WP</b>		Food-contact totes, bins and other product-contact containers shall not be used for other purposes unless the Operation has a policy or procedure that clearly designates approved non-product contact uses and how the containers are to be marked or labeled for that purpose. Food-contact totes, bins and other packing containers and equipment that are no longer cleanable shall not be used for packing but can be used for other non-food uses if clearly marked/labeled.	Auditor observes whether Operation has a policy prohibiting use of product-contact containers for other uses unless otherwise labeled, and observes current practices for compliance with the policy.	Operation develops the policy. Retraining is performed and documented.
P-8.7	Pallets shall be kept clean and in good condition as appropriate for their intended use.			Operation inspects pallets prior to use for conditions that may be a source of produce contamination. Pallets that are not cleanable are removed from use. Pallets and other wooden surfaces are properly dried after being washed.	Auditor observes pallets for compliance.	Operation removes noncompliant pallets from use.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>P-9: Storage</b>						
P-9.1	Product storage areas and conditions shall be appropriate to the commodities stored.			Produce storage locations and conditions shall not pose a risk of produce contamination, consistent with industry standards or prevailing regulation.	Auditor observes storage area for evidence that stored produce is protected from contamination.	Operation designates and maintains storage areas to prevent contamination of produce.
P-9.2	Iced produce is handled so as not to serve as a source of contamination.			Protective measures are provided in areas where iced product is stored over food items in order to prevent melting ice from contaminating product below.	Auditor inspects any iced product on premises for compliance.	Operation develops written procedures to handling and storage of iced product. Operational deficiencies are corrected. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
P-9.3	Non-product storage areas shall be maintained so as not to be a source of product or materials contamination.			Areas designated to store materials, whether indoors or out, shall be clean, well ventilated, and designed to protect materials and produce from contaminants.	Auditor observes storage area for evidence that stored materials are protected from contamination.	Operation designates and maintains storage areas to prevent contamination of non-product materials.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-9.4	Materials and packaging materials shall be protected from contaminants.			Materials stored in uncovered areas shall be protected from condensate, sewage, dust, dirt, chemicals, allergens or other contamination. Materials shall be stored off the floor/ground on pallets, slip-sheets or stands and covered where applicable.	Auditor observes stored materials for protection from contamination.	Operation develops and implements written procedures for materials storage. Operational deficiencies are corrected. Affected product is evaluated for potential contamination and disposition.
P-9.5	Adequate space shall be maintained between rows of stored materials to allow cleaning and inspection.	<b>WP</b>		Materials shall be stored away from walls and ceilings. Written procedures shall be followed to guarantee the proper cleaning, inspection and monitoring for pest activity in storage areas.	Auditor reviews the procedures and observes the storage area to determine whether storage practices allow cleaning, inspection and monitoring for pest activities.	Operation develops and implements a written procedure, and moves material into compliance.
P-9.6	All chemicals shall be stored in a secure separate area. All chemicals shall be properly labeled.			Chemicals, including cleaning and maintenance compounds and lubricants, when not being used, are stored away from product handling areas and in a manner that inhibits unauthorized access. Food-grade and non food-grade lubricants are kept separate from each other.	Auditor observes that chemicals are properly labeled and storage practices protect against product contamination.	Operation designates a secure area for storage of chemicals. Unlabeled chemicals are labeled or properly discarded. Retraining is performed and documented.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-9.7	When produce is cooled, it is cooled to temperatures appropriate to the commodity according to current established regulatory or industry standards.	<b>R</b>		When required for food safety or by industry guidelines, steps are taken to minimize temperature increases and minimize the time between produce receipt and cooling at the Operation. The product temperature and equipment control mechanisms are calibrated and monitored at a defined frequency and temperatures are kept appropriate to the commodity. Records are maintained.	Auditor reviews cooling procedures for commodities requiring temperature control, and reviews temperature logs for evidence of compliance.	Operation develops and implements procedures to monitor cooling procedures in compliance with current established regulatory or industry standards.
P-9.8	Where temperature control is required for food safety, cooling facilities shall be fitted with temperature monitoring equipment or suitable temperature monitoring device.	<b>R</b>		Temperature monitoring equipment shall be located in all temperature controlled areas, and shall be located so as to accurately monitor the temperature. Temperature measuring devices shall be monitored and calibrated on a scheduled basis or as needed.	Auditor observes evidence that temperatures are being monitored, and reviews calibration records and procedures for temperature monitoring equipment.	Operation establishes and implements temperature monitoring procedures.
P-9.9	Cooling equipment shall be maintained so as not to be a source of product contamination.		●	Cooling equipment (e.g. hydrocoolers, air coolers), shall be inspected, all debris removed, and cleaned and sanitized according to written sanitation SOPs.	Auditor reviews cooling equipment maintenance and sanitation procedures and inspects equipment for compliance with procedures.	Operation develops and implements effective maintenance and sanitation procedures.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>P-10: Transportation (Packinghouse to Customer)</b>						
P-10.1	There is a written policy for transporters and conveyances to maintain a specified temperature(s) during transit.	<b>WP</b>		When refrigerated transport is required for food safety, transporters have written, predetermined temperature ranges for commodities being transported.	Auditor reviews documentation of predetermined temperature ranges.	Operation develops, documents and implements temperature range requirements.
P-10.2	Prior to loading, the vehicle shall be pre-cooled.	<b>WP, R</b>		When refrigerated transport is required for food safety, the proper temperature for pre-cooling is appropriate to the type of produce and as specified by documented protocol.	Auditor reviews documented protocol, shipping checklist records, and observes vehicles during loading for compliance.	Operation develops, documents and implements vehicle cooling requirements.
P-10.3	The refrigerated transport vehicles shall have properly maintained and fully functional refrigeration equipment.	<b>WP</b>		When refrigerated transport is required for food safety, Operation has a written policy that refrigerated transportation equipment shall be controlled by a thermostatic device as necessary to maintain temperatures in the cargo area for the particular type of produce being transported and as specified by documented protocol.	Auditor reviews written policy and observes refrigerated transport vehicles in use at the time of the audit.	Operation develops, documents and implements a policy. Retraining is performed and documented.
P-10.4	Where required, temperatures of product are taken and recorded prior to or upon loading.	<b>WP</b>		When refrigerated transport is required for food safety, Operation has a written procedure for when and how to measure product temperatures prior to or during loading.	Auditor reviews written procedure and observes temperature monitoring procedures during loading	Operation develops, documents and implements a policy. Retraining is performed and documented.

<b>Req. #</b>	<b>Requirement</b>	<b>DOC</b>	<b>MAN</b>	<b>Procedure</b>	<b>Verification</b>	<b>Corrective Action</b>
P-10.5	The Operation shall have a policy, written procedures, and a checklist to verify cleanliness and functionality of shipping units (e.g., trailer).	<b>WP, R</b>	•	Shipping units shall be clean, functional and free of objectionable odors before loading, in compliance with current industry practices or regulatory requirements for that commodity. Refrigeration units, if used, must be in working order. Procedures include prohibition of raw animal or animal product transport, or other materials that reasonably may be a source of contamination with biological, chemical or physical hazards. Shipping units shall be washed between loads if prior transport included materials that reasonably may be a source of contamination. A responsible individual shall sign or initial the completed checklist or inspection report.	Auditor reviews cleaning procedures and inspection records and inspects produce transport vehicles for cleanliness.	Operation develops the policy and written procedures. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.
P-10.6	Loading/unloading procedures and equipment shall minimize damage to and prevent contamination of produce.			Personnel responsible for the loading and unloading of produce shall take steps to minimize the potential of physical damage to produce, which can introduce and/or promote the growth of pathogens. Loading/unloading equipment shall be clean and well maintained and of suitable type to avoid contamination of the produce.	Auditor observes loading/unloading procedures for evidence of practices that result in excessive damage to produce. Auditor observes loading/unloading equipment for suitability and condition.	Operation revises procedures. Retraining is performed and documented. Affected product is evaluated for potential contamination and disposition.

## Logo Use (L)

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>L-1: Food Safety Plan or Quality Manual</b>						
L-1.1	The Operation's food safety plan or quality manual contains procedures on how the USDA GAP & GHP logo will be used.	WP	●	The Operation shall have a written policy describing proper use of the logo including having attained approved GAP & GHP program status by meeting the acceptance criteria for the audit being performed covering all scopes of the audit which are applicable to their Operation. All commodities grown, handled or processed by the Operation must be covered by the audit.	Auditor shall review the Food Safety Plan for detailed and complete procedures on logo use.	The Operation shall develop procedures on USDA GAP & GHP logo use.
L-1.2	There is a designated person to be responsible for the control of inventory bearing the logo.	WP	●	The Operation shall designate, in their food safety plan or quality manual, an individual or individuals that are responsible for the control of inventory (any containers or labels) bearing the logo or language.	Auditor verifies there is a designated person responsible for control of inventory bearing the logo.	Operation designates an individual, in their food safety plan or quality manual, to be responsible for the inventory bearing the USDA logo.
<b>L-2: Traceability and Recall Programs</b>						
L-2.1	The Operation uses the USDA GAP & GHP logo only on packages, containers, or consumer units which are traceable.	WP	●	The Operation shall have a policy that prohibits the use of the logo on any packages, containers or consumer units that are not part of the established traceability program.	Auditor reviews policy and observes packages labeled at the facility with the USDA GAP & GHP logo are traceable.	Operation develops a policy.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>L-3: Approved Suppliers</b>						
L-3.1	The Operation has supplied a list of approved suppliers to the local Federal or State auditor's office.	<b>R</b>	•	Operation supplies the local Federal or State office who conducts the audit, with a current list of approved suppliers. The Operation will notify the office of any additions to the suppliers list as well as if a supplier is no longer in compliance and must be removed from the list.	Auditor reviews record showing all names of suppliers and verifies dates of when their names were given to the local auditor's office.	Operation supplies list to the local office.
L-3.2	All suppliers currently in use by the Operation are listed on the supplied list of approved suppliers.	<b>WP, R</b>	•	Operation procures ingredients and materials only from approved suppliers.	Auditor reviews receipt records and compares suppliers of ingredients and materials against list of approved suppliers.	Operation updates and/or creates list of approved suppliers, and procures only from these suppliers.
L-3.3	All suppliers have successfully completed and met the requirements of a USDA approved GAP & GHP audit (USDA GAP&GHP audit, commodity specific audit, Produce GAPs Harmonized Audit, or Harmonized GAP Plus+ Audit).	<b>R</b>	•	The Operation requires the packinghouses, distribution centers and other post-farm gate operations who wish to utilize the logo, to have an approved supplier program, which at a minimum verifies that all suppliers of fresh produce have successfully completed and met the requirements of a USDA approved GAP & GHP audit. All audits must be conducted by a licensed USDA auditor under federal oversight.	Auditor reviews evidence of suppliers having met the requirements of a USDA GAP & GHP audit.	Operation ceases to use non-compliant suppliers. Non-compliant suppliers must discontinue use of the logo immediately.

Req. #	Requirement	DOC	MAN	Procedure	Verification	Corrective Action
<b>L-4: GAP &amp; GHP Logo Approved Use</b>						
L-4.1	The logo is only used on products, processes, and packaging as approved on the SC-652.	<b>R</b>	•	The Operation shall have a copy of the approved SC-652 which lists the products, processes, and packaging types the logo is approved to be used on. The logo is being used as approved.	Auditor verifies that the Operation is only using the logo as approved on the SC-652.	Operation discontinues use of packaging on unapproved products, processes, and/or packaging.
L-4.2	All packaging or labels, which bear the GAP & GHP logo, are accountable items.	<b>WP, R</b>	•	The Operation shall have a policy stating all packaging or labels are accounted for.	Auditor reviews policy.	Operation develops policy that ensures accountability of all packaging or labels bearing the logo.
L-4.3	The Operation's inventory list of these packaging or labels is maintained and current.	<b>R</b>	•	The Operation shall have an inventory list of any packaging or labels bearing the logo or language.	Auditor reviews records for accuracy and to ensure inventory list is up to date.	Operation develops and maintains an inventory list of all packaging and labels.
L-4.4	The logo is only used on packaging and labels that are clean and bright in appearance, without marks, stains, or other evidence of previous use.	<b>R</b>	•	The Operation is only using packaging and labels that are clean and bright in appearance without marks, stains, or other evidence of previous use.	Auditor verifies that packaging and labels are clean and bright in appearance.	Operation updates their practices to use the logo on packaging and labels that are clean and bright in appearance.
