My Market News

mymarketnews.ams.usda.gov

USDA Market News publishes market information for hundreds of agricultural commodities. Market News information promotes market transparency and helps farmers and businesses make informed decisions.

In 2018, Market News launched My Market News to improve the quality, customization, and accessibility of our data. This platform gives you faster, easier, and greater access to data and reports in one easy-to-use tool.

public DATA

Fine-tune datasets to compare price and volume trends over time and regionally.

Download customized datasets as CSV, XML or Zip files.

New, coming spring 2021: access market reports and datasets for specialty crops.

standard REPORTS

Access all standard reports.

New: pull current and historical data from reports simultaneously.

Easily download customized data into commonly used spreadsheet software.

Subscribe to have your favorite market reports delivered to your inbox when they publish.

API application programming interface

Automatically download large datasets in custom formats after initial setup

Contact mars@usda.gov for FAQs, webinars, tutorials, questions or to schedule a demo.

USDA is an equal opportunity provider, employer, and lender.
