1/ These figures are based on the consumption of fluid milk products in Federal milk order marketing areas and California, which represents approximately 92 percent of total fluid milk sales in the United States. An estimate of total U.S. fluid milk sales is derived by interpolating the remaining 8 percent of sales from the Federal milk order and California data. The procedure used for estimating U.S. fluid milk sales by the Agricultural Marketing Service is different from that used by the Economic Research Service (ERS) of USDA. Consequently, the sum of the monthly figures presented here may differ from the annual figures published by ERS. The ERS data series can be found at <http://www.ers.usda.gov/Data/FoodConsumption/Spreadsheets/dyfluid.xls>. For further information, contact Roger Hoskin of ERS at 202-694-5148. 2/ Percent changes, as well as sales volumes, unless otherwise noted, are not shown on a calendar composition basis. See 4/. Some data for January have been revised due to changes in the information from some reporting areas. Revised figures are in bold print. 3/ Total fluid milk products include the products listed plus miscellaneous products and eggnog. 4/ Sales volumes and percent changes have been adjusted for calendar composition; see http://www.ams.usda.gov/dyfmom/mib/clndr_comp_rpt.pdf.
