Subject: Data Requests

Good Afternoon!

I do not know what data requests have been made. I would like to have the following:

1. For each of the orders for the two years May 2007 through April 2009 of the Federal Order Minimum Cost for Selected Products/Containers. Arizona publishes one and a copy is attached.
2. The report posted in the National Hearing on website showing Annual Route Sales by Handler Type—Eight Orders, Can this be combined to show all ten orders?
3. For the same report, can estimated pools be done if proposals one and two are adopted to show impact of additional Class I sales from the elimination of producer handlers above 450,000.
4. For the same report, can the total pounds of unregulated milk marketed by partially regulated handlers be identified?
5. For the same report, can the total pounds of non Class I milk by producer handlers and exempt plants be identified?
6. For each order, I request a theoretical pool relend for May and November of 2007, 2008 assuming a single theoretical producer handler of 3 million pounds of Class I removes that amount of Class I sales from the pool to show amount. Frankly each month would be nice, but those four months would be reflective enough. The same for 1 million and two million pounds.

This information may already be requested in other forms in which case I am not asking for any duplication.

Thank you
Beb
