

**Issue:**

Grading Soybeans of Other Color for domestic receipt & movement and export shipment.

**Background:**

In the last few years (3-5) we have seen an increase in Soybeans of Other Color (SBOC), mainly in the smokey gray type of coloration. When dissected, the inside of the bean is a quality yellow soybean. This is an issue with the hull only.

**Next Steps:**

Facilitate a discussion among GIAC members regarding Soybeans of Other Colors.
