

Wholesale Markets and Facility Design

The Wholesale Markets and Facility Design team provides technical assistance and support to stakeholders regarding the construction of new structures or the remodeling of existing ones. These facilities include wholesale markets, farmers markets, public markets and food hubs, all of which are important parts of the national food distribution network. The facilities may be indoors or outdoors, a single building or an industrial complex.

Market construction projects can require major capital investment. Our involvement may facilitate project advancement. The design involves far more than its appearance; the building must be functional, safe, and efficient and must meet the needs of the people using it. Our support involves leadership in all phases of design development. In developing the design, our work follows building codes, laws, regulations, and other requirements. We do not provide construction ready plans.

Our services include assistance in:

- Review of environmental issues
- Site selection and layout
- Initial design concepts
- Architectural sketches
- Design programming
- Floor plans, elevations, sections
- 3D Renderings
- Building square foot cost study
- Coordination with local design professionals
- Third party design reviews

Our services do not include:

- Engineering services
- Electrical services
- Mechanical services
- Plumbing services
- Structural services
- HVAC services
- Equipment selection
- Construction specifications
- Construction documents
- Construction administration
- Documents for construction
- Line-item cost estimates

To request assistance complete and email the following form to: Ronald.Batchter@usda.gov and Sasha.Pokrovskaya@usda.gov.
