Dear Sir,

We are dairy farmers in a partnership with our Son and his wife and our daughter and her husband. our grandson also helps us. We milk ¹⁵⁰ ~~15~~ Cows and ^{have} 200 head of replacement heifers.

Milk pricing must contain the dairy farmer's cost of production, or we can not keep going. High fuel prices, taxes, feed cost, Vet bills, new machinery plus repair machinery.

We feed the Country with healthy milk, inspected, not like the foreign imports. Thanking you, I am 82 years old and still with my wife we feed our young stock. We would like to see our family farm go on.

Braund Valley Farms

Thank you

Elwood Braund
