

Dear Sir

On to whom it may concern
It has come to my attention
that there has been an increase
proposed in the make allowance
program

my question to you is
where is your "common sense"!!
How can you continue to rob
the dairy producers when we
have already been robbed beyond
the limits of our endurance

It does not take a PH.D
to do the math at 12000 per hundredweight
for milk that costs approx 15.00
to produce ~~and~~ the vital part of
the industry is being shafted
out of business. without the
producers the processors and
distributors will be left sitting
high and dry and starving
to boot. It would serve them
right.

The time has come to smash
the pricing system:-

my suggestion is to eliminate
and bearing from the CME
eliminate Federal Order pricing
The Government should not be
involved at all and stop importing
Dairy products Let supply
and demand for each region
control pricing Larger Corporations
like DFA DMS Dean Foods
need to be broken into tiny
particals

If we are to save ~~the~~
Dairy industry and economy
we need to act fast
stop the greed and direct
revenues where they belong
Where IS YOUR
Common Sense ???????

Samuel J Zook
Dairy Producer
