

We are Dairy Farmers and are barely surviving right now. We know milk is very scarce here in the east, but we only cheer 11.05 per CWT. Please help us, Thank You Samuel S. Zook Jr.

WE HAVE TO DO SOMETHING NOW BEFORE THEY PUT US ALL OUT OF BUSINESS!!!

~~28.93%~~ I borrowed 10,000.00 a few months ago & it is about all spent! Their plan is to break the farmers, get us dependent on imported food; contaminate the imported food and blame it on their enemies!!! It would be all over for the USA!!! They could take us without firing a shot!!! We are in immediate danger!! Farmers are as vital to our national security as our military is. We must stop the importation of all food and animal feed NOW!!!

The alternative is to soon live in fear; in chains and in slavery; under a police state rule so brutal that we dare not resist or complain!!! You can help. Make as many copies of this letter as you can and give ten copies to everyone you see. Ask them to give one to everyone they see. Send a copy to your congressman and senators.

Buy food grown only in America!!!!

In one year alone we lost 5,000 dairymen just in Wisconsin. If we continue losing our farmers at the current rate, we will be dependent on imported food in less than six years (Al Gore wanted it to happen by 2005)!!!! Al Gore is one of those who are planning the extinction of American agriculture and the overthrow of the US Government!!! He is part of the conspiracy!!!

The enemy is entrenched!!! They have at least 101 of their own people in our US Senate and Congress. Others of their people occupy key government positions while they profess to be our friends!!! They control most of our mainstream news media and they already have their own alternative food supply stamped with their own symbol on the label!!!! All that is left for them to do is to break our farmers; get us dependent on imported food; contaminate the imported food and they own us!!!

To All Dairymen: The price of milk is set according to the price of cheese. The price of cheese is determined by the amount of cheese on the market; and that is influenced by the amount of cheese being imported. Stop importing cheese, the supply decreases and the price of cheese and milk goes up.

We must stop importing all food and all animal feed now!!!

This is a testimonial from Levi L. Stoltzfus, Quarryville PA.

I called Frank Lampley's office today to let them know that I would be making a payment soon. I explained to the woman that I spoke to, that I was trying to save some money by stopping the Formula M. Since I stopped using Formula M, I have noticed a drop in milk production, the cows' appetites were not as good, I started having trouble with sore feet, my SCC started to go up and I could tell by their manure that they were not digesting their feed as well as they were when they were getting their Formula M (twice a day) everyday. I was trying to save money because of the milk prices dropping. I found out that by stopping the Formula M I was not saving money; I was losing money.
